['It is difficult to get collaborations in these times of pandemic, but this service taught me and helped improve my way of communicating with businesses and working as a team', "Well, I hope that now my hours are worth it, not like last semester when I did a whole semester and they didn't give me a measly hour, I don't like them", 'The only thing I disliked about the service was the lack of collaboration from my teammates, since they rarely attended meetings with the training partner, did not participate in the development of the challenge, and did not complete their parts of the job on time.\nIt saddened me to see the lack of motivation and empathy from my colleagues when working for a social cause. I truly believe that something should be done about it.', 'I really liked the experience because of the openness of the SF to exchange ideas to get involved in the synchronous sessions.', 'I did not feel that my work had an impact, it was very little that I did.', 'It is a project that sometimes requires work and dedication, but it is an experience that helps develop your social skills and your role in the community.', '.', 'It has been a very good experience, I feel that as such the Canvas platform can improve because the greatest value I have acquired from the service came from the experience with the organization of Casa Monarca and not with the Canvas platform and consequently the learning and unlearning also.', '.', 'I loved it, especially because it is with animals.', '.', '.', 'I loved participating in the martial arts for life social service program, it is something unique and I have a great experience and many lessons.', 'Despite the current situation we are experiencing and the distance, we have met our goal.', 'I liked being able to understand a reality of which I was not aware and being able to contribute to the improvement of that reality', '.', 'Excellent, I only wish that the option to continue participating could be extended since we wanted the entire semester and we were only allowed 10 weeks!', 'I was chosen as a representative to close the social service project and I am really happy because I learned a lot of information that I did not know before the project.', 'The truth is that I really liked the social service and I feel that it was interesting to feel that it helps in some way despite having been remote.', 'I really liked the way in which with a single fundraising campaign, we were able to make everyone in the organization very happy, since it was a feeling of hope to be able to move forward. I really liked being part of this feeling.', 'I really liked the service this semester', "I really liked the fact that I just had to present on topics that I find extremely interesting, such as jealousy and the expression of emotions. In both subjects I did the research and the presentation, so I also learned a lot. As I mentioned before, I consider that they are issues that are present in our daily lives, more so in the life of a teenager, so the fact that I was able to contribute my point of view and even my own experiences that I discussed in the presentation, makes me feel very satisfied. I am a person who really likes to give advice and listen to people. In this case, I couldn't listen, but I could give advice so that the people who have listened to me can change even small things in their lives, to be happier and calmer with themselves. :)", '.', "It definitely serves the community, but at the same time it helps us as people to realize how the pandemic has changed everyone's lives in different ways.", 'I really liked participating in this project since it promotes the values \u200b\u200bof empathy and communication with people who need it', 'I liked the communication that there was and the activities carried out', "I liked that even though we couldn't be present teaching the classes, there was a certain type of connection with the listeners thanks to their participation in the lives.", 'I liked the collaboration and teamwork that I achieved with the rest of the group.', 'Despite the fact that it was done in quarantine, the truth is that the closeness with the organization was satisfactory', 'I thought it was an excellent solidarity project and I am quite satisfied with it.', '.', 'I liked living like every week, both the young people in the home and us gained more confidence. We increasingly taught the sessions with more security and made the classes less monotonous, so much so that the youngsters enjoyed participating when we asked a question. We created an environment of respect in which we all learned about climate change.', 'Something interpersonal that led me is that I met several of the group and that we are remote. This collectivity was important to the success of working with this OSF.', 'The initiative is good but I feel that it is not presented well', 'It seems to me a very interesting cause but the lack of communication on the part of the osf made it a tedious activity', 'In these 10 weeks I learned a lot about the training partner organization and I consider that it was really an enriching experience. I am happy to have participated in it and to have been able to do a bit to help those who need it the most.', 'In short, teaching takes you out of your comfort zone and is another way of learning. Many times we think that it is easy to explain a topic, but it requires a lot of preparation.', 'I loved the social service since environmental education is very important for future generations', 'The topic that was discussed in

the service is very interesting, it was not only helping the organization but also challenging us to find ways to make our solution proposal efficient and really add value to the objectives.', 'Despite being at a distance, I liked it a lot, you can also learn that giving classes in this format facilitates transfers', 'I really liked creating content to raise awareness about the different issues involved in eating disorders, it is an important problem to take into account and I loved being part of your team this time', '.', 'It is difficult to see even a real change when you carry out your social service online, but I fully trust that the material we produce in these 10 weeks will be very useful for the organization and will be directed towards the public for which it was created.', '.', 'I loved being able to take my skills to the fullest and collaborate with a training partner who was always on the lookout', '.', 'Being my first time participating in social service, everything was very new but at the same time enriching, I have learned a lot', 'It was very good to be able to help to get to know more about this organization', 'I really liked the Sibila service since I feel that it is very flexible on the platform and you can also provide something very useful', 'Very cool the feeling you have to help someone else learn and think that what you are doing can influence their future decisions', "I liked the experience because it took me out of my comfort zone. The only thing I didn't like were the canvas quizzes because the information is very repetitive when we already had another solidarity project.", 'The whole solidarity project was very interesting and I learned many things. It is important to put yourself in the shoes of others and help the people around us. It is clear to me that with my actions I can have a positive impact in my community. The important thing is to start the change with yourself. Thanks to the Rolivel Foundation for the great work they do to help adolescents in this country.', 'Teamwork in projects of this style is something interesting', 'I liked that I learned about different topics, I became a more empathetic and sensitive person.', '.', 'I really liked participating in this project because I learned many things that I did not know about the indigenous communities and their settlement in the city of Monterrey. I realized that there are many communities and that they mainly live on the outskirts of the city. Although I did not have direct contact with a person from these communities, the training partner answered all the questions we had regarding this topic.', 'It was exhausting taking it along with my other subjects', '.', '.', "I liked it a lot, it wasn't heavy, and I really enjoyed it. In the same way, I consider that I learned new things and it made me want to continue helping the environment and the turtles:) ", 'My experience came to a head when they shared the photos of the children who are part of the program and seeing their excited faces was when I realized that all of this had been worth it.', 'The themes are very interesting, the way they are applied is quite simple', '.', 'I liked the amount of service charge. I did not stop studying to do my service and he gave me enough time to do it well.', 'I really liked the experience, in addition to taking a lot of knowledge with me, I also hope I was able to contribute a little to the organization. Very good follow-up on the part of those in charge and a lot of willingness to serve. Thank you so much!', 'I liked learning the process behind a course and also knowing the efficient ways to educate and communicate with people', 'Working as a team in the end was something very profitable, I was able to get to know different points of view and support myself with my colleagues to make a deliverable that could be valuable for the partner.', '.', 'I liked that we always had communication', 'The truth is that I wanted to live the face-to-face experience and be able to contribute more than I did', 'I was very nervous when presenting but it turned out very well, thank you.', 'I liked working with Casa Monarca and the teacher Andrés and above all meeting new people', 'I was able to feel that I was contributing my bit from home and I learned about turtles like never before.', '.', 'He took me a lot on the topics discussed during the sessions.', '.', '.', 'I unlearned and learned a lot :). Thank you very much for all the information', 'I liked the way in which it was adapted to the digital modality, they are very interesting causes and that despite the contingency and distance, it is of the utmost importance to continue supporting.', 'Every week we shared advances of the video and fundraising campaign and I really liked that little by little they gave us feedback to finish the project and be of great help to León Ortigosa', 'I liked the experience but I would have liked more to live it in person.', 'I learned a lot about eating disorders and how to communicate with and support people who may have them.', 'Honestly, this project would have been very cool to have done it in person', 'I really liked the topics that were covered.', 'First time in this style of experiences and I am sure that I will do it again in the future with great encouragement', 'I really liked it, since they allowed us to work freely and with flexible hours.', 'It was an experience that left me a lot, because I have always been interested in sharing my knowledge about climate change and everything about it, in order to make people more aware and to make a positive change in the world.', 'The experience

Thanks to them, I was able to come up with the right solutions to meet the needs of the training partner.', 'I think it was very good and that the students were also able to develop audiovisual skills.', 'It was with great satisfaction when the project could finally be carried out after so many weeks of planning. There were many obstacles but without a doubt the determination and commitment of my colleagues and training partner were the ones that encouraged the project to take place.', 'The way the project is designed helps you learn new things and be able to share them with others.', 'Unfortunately I had to go through this experience remotely and not in person and I feel that in person it would have been even better but taking into account the circumstances of the confinement I am completely satisfied since I received support for the creation of the deliverable and it also took me many learning in a general way and in short I would put this social service back for future occasions.', 'Excellent service and cause. I loved working with the Yepez Foundation and with the people on my team', 'It really was a very enriching experience and I end this stage being very happy. I will definitely keep in touch with the foundation.', '.', 'Participating in social service is not easy, it requires effort, loyalty and discipline. I am glad to see the motivation of the members of the Yepez Foundation. I hope to participate with them again.', 'Very organized', "I think it's a good way to apply social service remotely", 'It was a very pleasant and satisfying experience.', 'I am very happy with how they were organized and I feel much more motivated to continue supporting this problem.', 'I recently participated in a conversation where we were talking about indigenous communities, however the position of the people was privileged and I had to present everything I had seen in class and defend indigenous peoples with all my new knowledge, I felt very good since this new position was very engraved in me.', 'I find it very satisfying the fact that people seek a common good', 'I quite liked it', "Very gratifying, even if it is virtually, to be able to see an impact in someone's life through your effort and dedication.", 'I really liked the way they gave us the proposed case to be able to make a creative solution to it.', 'It was an experience that I believe all students should experience at least once during their college career.', '.', 'I was interested in the texts that they shared with us and I liked developing the project that I delivered. ng my time, skills that I develop throughout. Enjoy this experience very much.', 'Having done it online was a different but rewarding experience.', '.', 'I can only comment that the social service exceeded my expectations about what it would be like to be part of a social service in the middle of a pandemic and I left quite satisfied with the communication from the instructors since they knew how to engage me in a subject that I normally find myself blinded to because of my privileges and made me want to continue participating, informing myself and collaborating with them again.', 'I liked being able to share the knowledge I already have with people who need it.', 'I would have liked to have it in person but it was a good experience within the allowed conditions.', 'I feel that it is incredible that everything is real, the testimonials as well as the deliverables that they asked of us, help us to be people of more values.', 'I was able to eliminate several myths that I had internalized about donating blood.', 'The development of the video is very interesting and it is very nice to be able to help this community.', 'It seemed very important to me to be able to support a part of society that is so limited and to be able to do something about it.', 'I loved working and learning with blooders', 'I liked it all', 'It was a different experience, I would have loved to be able to live this in person, and thus be able to hear all the cases out loud, in order to generate more value propositions.', 'I consider it very important to share knowledge as it was carried out in this solidarity project, I think it is very satisfying to see that the objectives were achieved and that we were all part of this to reduce violence in society and create a quality life in the people.', 'I really liked this organization.', 'I liked the part of having created the videos to support the better understanding of young people about the proper use of electronic equipment, capable and it could also have helped to have shown some parts in person or in person since there are parts such as "how to fold and keep your loaded" things like that are better understood in person.', 'I really liked that we were able to get in touch with the indigenous community and seek proposals to raise awareness about compliance with their human rights, but I did not like that the experience was completely virtual, although I know that it is something that is due to the current situation.', 'It is an incredible experience, you feel happy helping the organization because you see all the effort they put into ensuring that the horses are healthy and happy and that the people who come with them feel completely confident.', 'The social service was something very different from what I expected and much more challenging, but I believe that it is very worth facing these new challenges and I take an endless amount of new learning. Going to the facilities and being able to see the components of an electric chair for sports up close, as well as their integration, seemed very good to me because we got much closer to the reality that children and young people experience when practicing the sport. sport. Being in contact with young people who practice sports allowed me to realize the prob

They made me feel that what I did did not work. They never knew how to tell me that they were looking for the infographics that they asked me for, so I lived it making different formats with different information and they never gave me the go-ahead, since every week they changed their minds. In the end they told me that it was not my fault since I was not a designer, but in this mind the work and time that you dedicate to infographics was worthy for me to accept. I handed them about 18 infographics that I think they won't use and it's not cool to know that my time and effort going to a cause I care about wasn't worth it.", 'Very good experience because working with children creates communication skills with them, patience, motivation, initiative, etc.', '.', '.', 'Quite different and profound with respect to its impact on my person', "I really liked the topic preparation talks, they were basic topics but very useful to everyone's daily life.", 'I liked it a lot, and I would like to repeat it, because I learn a lot about values \u200b\u200band later I can teach them to other people', 'It was very funny.', 'I leave very satisfied and grateful', 'I loved all the talks and activities that were carried out during the semester', 'I liked', 'A highly coordinated and comprehensive social service, beneficiary sessions help connect you with people.', "I really liked my experience, I practiced the values \u200b\u200bof responsibility, commitment, solidarity and empathy at all times. I ran into a person in charge of our area within the organization, who did not listen to people and made it very difficult to work with the organization. In terms of awareness, the reality was that I could have been working in an office dealing with anything they could think of and have had the same contact with the social cause. I want to clarify that the latter is not due to the online model, since in the summer I had another experience with another organization and it was totally different. I think, it is because, on the one hand, they talk about social service as a way of approaching realities different from ours, but on the other, the options that were available to register were pure administrative work that it would be the same to do them in an NGO or in any other side.', 'It was very interesting but at the same time confusing, since we did not know what we were asked to do or the requirements of the deliverables or tasks', "I really liked being part of this project, I realized that I don't need to go far to help. Not many showed up, but it was enough with the people who did attend. That time was the first time I got on an electric chair and the attendants taught us how to use it. We all had fun learning to drive in these chairs by racing each other and kicking the ball around. Later, in order to see how the chair works, we broke the whole chair down into parts, unscrewing and unscrewing it with tools provided to us, and later, we labeled the parts and classified them for easy understanding. It was that moment when I realized the good work that our training partner is doing, which is not an easy task. I learned how complicated it was to assemble these chairs and how hard it is to calibrate and arrange them in a particular way so that the participants can use them, not to mention how expensive they are. However, I also noticed that there was still a great deal of room for improvement, and from there I made a commitment to myself to contribute as much as I could to this cause.', 'I liked that I was able to put into practice some topics that I am seeing in my career in social service, so I see more examples of applied forms of what I learn.', '.', 'The different activities that give us', '.', '.', 'I found it very beautiful and interesting that a job, no matter how small we think it is, can really have a great impact on the development and learning of young children.', '.', 'very good, however the canva thing is complicated sometimes', 'It is very cool to be in teams and work together for a goal', 'Despite not being from the corresponding career with social service, I was able to develop with my tools and be able to contribute something new and innovative.', 'I liked doing this service.', 'I found it very interesting to delve into how the whole situation of the pandemic somehow affected entrepreneurs and companies, as well as their interest groups.', 'It was a new experience working in video production.', '.', 'It was a nice experience to get closer to social services during the distance because the implementation was good. I am very happy and grateful to the entire Sacbé STEM team!!!', 'I really liked that it was organized by students :)', '.', "Activities in Canvas are utterly banal, inconsequential, and generally a waste of time and resources. They do not contribute anything to the social service experience and only serve to jeopardize the validation of the time you have shared with the organization, and possibly in the eyes of the Tec, having done nothing, although in reality that would have been the opposite. The quizzes are tedious, the material is redundant, and essentially it's a big no-brainer (especially if you've taken an ethics or philosophy elective, already graduation requirements). There should be nothing to do on Canvas, social service is not a math class.", 'That I came to social service with an idea and left with another, I learned a lot with the person and with the training partner who received me and helped me improve as a person and in everything I did.', 'This experience not only allowed me to help children grow in their academic knowledge, but also helped me to grow as a person.', 'I really liked the follow-up provided by my finance coordinator.', 'I am very satisfied with my grain of sand with the project', '.', '.', 'It was a really nice experience.', 'learn to unlearn', '.', 'The way in which they designed everything so that it could offer a convivial environment was a very creative and interesting idea.', 'It was very heavy for me to be honest and sometimes I got very stressed about the deliverables. In addition to being able to talk and share stories with the migrants, it is an unforgettable experience. This service made me see life from a totally different perspective.', 'It is an experience that allows us to develop and grow as people at the same time that we can contribute to our society. It was an enriching and collaborative experience for all the students, but I feel that there was a lack of more communication or work spaces to review specific doubts and project progress. In addition, there was a lot of focus on modifying or correcting parts of the project when it was not complete, which slowed down the process, since it meant going back to previous activities without making any progress with the final product. Finally, take into account the availability of the students. The project did not have the best communication, as several people made it clear that they could not attend the times established by the training partner and not much effort was made to change the situation. For this reason, there was a lack of equitable involvement of the members and there were even people who did not work or were aware of the weekly meetings. These are some aspects to take into account, since it is a good project and the vision of the training partner is of high impact, but the role of the members must be better established and there must be good communication from the beginning to improve the results in the final product. .', 'I really liked being able to collaborate in a cause related to school education in children', 'I really liked connecting with the EMS to know how to help them', 'The few sessions that I had to which my EMS attended were very good, we clicked well and it gave me the impression that he did understand the topics we were dealing with. In addition, when solving exercises, I could see that she used the method and recommendations that we had seen in class. However, when he stopped showing up, he left me with a bad taste in my mouth and worried about what I could do to still have my service hours.', '.', 'During the first week, we did not know how many and which students would be part of the project, which made us lose some time, but it could be solved.', 'I would do it again', 'The contribution that we can give is quite good, however, there was a lack of organization so that the students were truly interested', 'The communication between the young people and me was very complex.', 'the EMS who participated if they feel like learning', '.', 'Develop more tolerance and empathy.', '.', 'I liked being able to give advice to the children because that way I was able to contribute a little to their education through reviews to remember what they saw in class.', 'Find out about the situation of other students that we can help, who need support to continue studying and who want to do so, despite being on vacation.', 'My experience was good, although I think I could have helped more people who needed it more and it would have been better to do it in person.', 'I liked almost everything, I would like that for the next time, the students are consulted before being integrated into the program, although I know that this is not the responsibility of the training partner', 'Get to know the organization and the problems it solves', "I liked getting a little perspective on what it feels like to be a teacher and much more during virtual classes. I think it's quite a challenge to teach this way and I definitely grew as a person through it.", 'Very good experience, it taught me to give without expecting to receive something in return.', '.', 'Establishing a tutor/student relationship with EMS has m

ade me more grateful for my current situation, as well as has expanded my desire to contribute to the world with social projects.', 'Excellent organization, I really enjoyed my experience with this training partner', '.', '.', 'It was a great project, totally aimed at people in my career and it applies a lot to what we know how to do for the social cause of the project.', 'I liked working on a solidarity project since most of them are very focused on what they want to achieve.', '.', "I loved my experience, being able to change 1 or more lives, being able to teach them some of my knowledge and make it easier for them, I think it's one of the best social service experiences I've ever had and I would definitely do it again", 'I would have liked more if they had been organized better.', '.', 'Apart from the negative aspects, there was a great opportunity to have an impact on people who need it. In general, I consider that mutual aid work like this multiplies the benefit of society.', 'It seemed a bit ironic to me that too many requirements are asked for student societies and many obstacles are placed on us to be able to carry out projects that give hours of social service but the same type of filters are not made in external projects. It took a lot of organization, I hope this situation serves as feedback to improve your next projects.', 'I liked having a direct impact with the students and doing my bit to improve education in Mexico', '.', 'I liked being able to interact with high school students, and this approach to the problem of education in Mexico helped me understand that motivation and the desire to want to learn and improve plays a key role in progress.', 'I would like to participate in a project with HIC ME again.', 'It is very nice to do social service with people of our same age.', 'It was very nice to listen to the people who were doing well in the community and very emotional to those who are barely surviving various problems that can hurt them a lot until death.', '.', 'Since I was a child, I have liked the idea of \u200b\u200bbeing a teacher. In this experience of social service, I could not only be a tutor, but also someone who could get involved in the problem of education, capable of seeing the need. I really liked participating and would certainly participate again with the intention of contributing to the fulfillment of SDG 4.', '.', 'This experience was quite a challenge for me, since contacting the students, getting to know them and empathizing with them, can be complicated. However, with patience, effort, and perseverance, I was able to achieve a good result with my assigned students. Likewise, the accompaniment provided by the organizers allowed me to get ahead and meet the expectations of the project.', 'I thought the approach they gave to the jobs and projects was very important, it was very nice to be able to feel that we contributed something positive to our community.', 'Very bad organization, in general there were many doubts and some remained unresolved. They could have planned it much better.', 'It was not very rewarding nor did I get a good response from EMS but I hope to learn from this.', 'It was quite a demanding and complicated service that served a greater purpose; The education. therefore I am satisfied with my development.', '.', '.', "Being able to meet high school kids in totally different situations and locations than mine is interesting, learning what they like and what their goals in life are reminded me of when I was in high school, some of us knew what we wanted to do after finishing high school, others weren't so sure.", '.', 'I really liked the experience, I believe that the objective of the organization and the impact it causes in the community are very important.', 'It was a bit of a mess due to the inconveniences that were generated, however it was a great opportunity and a great project, I would probably take it again if there was a chance.', 'I consider that it was a very good experience, I feel very satisfied with my work in this solidarity project', 'I understand the situation of the students, but from the beginning they must have been given some type of course or induction so that they understood the program and only those who really wanted it, got involved. There was a lot of confusion and everything happened very quickly with little planning time.', '.', 'I really liked the experience of being a teacher.', 'I really liked how even though things were not going as planned, we each managed to have different tasks. The truth is that I really appreciate the effort, especially from the coordinators, who have been the ones who have been day and night answering our questions and trying to make everything flow in the simplest and stress-free way possible.', 'I think it is a very important opportunity to be able to give back and actively participate in our community.', 'I loved better decision.', 'I liked it a lot, very challenging', '.', 'It was very difficult to contact EMS, I had to send a lot of emails and later messages. In the end I was only able to contact one student well, but we have been able to get along well. Now we speak easily and I trust you have learned, as I have.', 'I really liked it and I like the objective of the project. But it is a bit sad that you prepare your material and your class and then nobody connects :)', 'It was an unpleasant experience for me, I understand that many of the factors are external to the organizers of the service, but in the end the results are not good or satisfactory.', '.', 'I really liked helping EMS with communication issues.', 'In partic

ular, I really liked this experience because I was able to see the life perspective of the students and how they are going through their pandemic.', 'I really liked the fact that the coordinator of the organization was clear that the work we do is of value and therefore they were not limited in the hours they gave. It was made clear that good work would be rewarded with fair hours. This seems important to me because many projects from other organizations requested a very significant amount of work and credited a maximum of hours that really does not reflect the time that has to be invested to carry out the activities.', '.', 'There were several communication problems and the logistics and way of proceeding in the social service were not seen as well planned, but the important thing was to help those students who have been left behind in certain educational issues', '.', '.', 'By being a tutor I learned many values such as being more understanding, looking for solutions and being patient.', 'I really liked starting to give my service to the community in a noble way with the assigned students', 'Yes, it was a bit disastrous at the beginning, but I liked how coordinators, advisers and tutors managed to reach agreements and solutions to each and every one of the problems in order to make it work, and somehow it did work, I liked that, learning from problems', '.', '.', 'The few students who did answer me were the best tutoring experience I had in my life', "I enjoyed it even with all its limitations and contingencies.\nIf I join this cause, it is because I BELIEVE and SHARE its cause; I think that all of us who were in Aprendamos Juntos is because we are excellent students who are concerned about the education of others. I and many others appreciate that you have done such a noble project; but I have understood that it is the first time that they do this project, the error here is the inexperience (I know what they have to say, how easy it is for you to say it); what failed us was the organization and seeing pessimistic probable scenarios (in this case, that the students did not respond). I'm still standing up for your cause, and we're here to help! I hope that in future periods (because without a doubt, this project has a LOT OF FUTURE and a very good cause); They can be in charge of notifying all the beneficiaries on time, and fulfill their work as a communication channel in a timely manner.\nWe would also have expected that the young students would have joined of their own free will (even if this would have considerably reduced the number of students involved). QUALITY IS WORTH THAN QUANTITY.", 'In the end they left us on our own.', 'I think that an area of opportunity in this project is time and organization. Being able to have a better organization before the project starts, since a lot of time was lost in contact with the EMS, more is started to give advice. In case the time that we are given to cover all the topics is measured, the fact of having wasted time reduces the ability to give something of quality.', 'The experience was challenging, I liked the dynamics and the purpose of the service, however, due to logistics and communication issues, many EMS were not aware of the situation that we were telling them about, so they were a bit disoriented and many already had plans to work. this being his only and first source of income', 'I reiterate, the organization gave a lot to be desired. There were many tutors who were never assigned students. Personally, they accepted me as coordinator and ended up changing me to tutor and support coordinator.', 'It is a very good cause to which I liked to participate.', "I was glad to have the opportunity to have an impact on someone's academic life.", 'I consider that there were some unnecessary formats and meetings.', 'It was very interesting to put teamwork into practice to find different ways to teach different levels of English in a simple and effective way.', 'Very interesting', 'I liked the experience, although the description of the project was not 100% correct', 'I really liked sharing with these students and being able to help them with what I could. The project in general is a little disorganized, but I admit that the social services did their best to help us. However, there was no cooperation from the training partner, or the high schools.', 'It was worth all the effort, the lives of students have been impacted and I am satisfied with that', 'My EMS were very participative and had great interest in the project.', 'When I found out in the training and in the sessions with the project coordinators about the great limitations that many high school students have, I understood the important role of being a tutor, whether they were 2 or 6 EMS, I know that the impact that will be had in a future will be magnified in a positive way, and this motivated me to always have a lot of energy and put all my disposition in the counseling sessions.', 'Very complete', 'Once again, the organization by those in charge of the project was not appropriate and caused many to have confusion and start much later', 'I had a lot of fun and I really liked that the kids who have fewer students got along better with their students as well as being something more personalized for the students. I know you had thought about groups of 4 or more but the dynamic with 1 or 2 gets more fun.', '.', '.', 'During this experience in the Aprendamos Juntos project, I learned to be more patient, I learned to be more empathetic and also, from my point of view, young people are interested in learning about acad

emic subjects, but the context is not very favourable.', "It's complicated online", 'I did not have the opportunity to really engage in a conversation with my EMS due to certain socioeconomic conditions that they had, however, I feel that the planning of the program was not carried out by the correct people, falling into a point of frustration for tutors like me of value. of the project.', 'Citizen participation in this type of project goes a long way.', 'It is important to be able to help any training partner, but it is more important to be able to work to save lives', 'More coordination is needed between high schools and OSF', '.', 'There was a student who told me that the counseling helped her a lot and that she was very grateful for everything she had learned, this is the result of all the effort that the organizers of the project put into it. Thank you so much!', 'I only had one formal counseling session and then the only two students who answered me withdrew from the project due to lack of interest. I was excited to be a part of the experience but it ended up being less than pleasant.', 'The truth is that I thought it would be easier but it is really a job that requires a lot of patience and consistency.', 'Lots of disorganization and unclear activities or processes', 'It was very important for me to be able to be part of the education of people who do not have the same resources or knowledge to carry out the activities', 'It did not start in the most favorable scenario because we could not contact the students, most of them were not even aware of the program. But in the end with at least one child we stayed with was more than enough.', 'I think there was a lack of better participation or communication with the tutors, but those who did stay to learn were really participatory', 'I really liked teaching communication', 'The idea is very good. The organization is terrible. The project needs a lot of work to fulfill its true purpose', '.', 'The moment I was looking for someone to interact with', 'Much more organization is needed for a project like the one that was carried out', 'The student was very grateful for the support provided and that made me feel very happy to have participated in the program.', '.', 'Interesting', '.', '.', 'Great experience, the activities were appropriate and helped me develop personally and professionally. Putting together a manual for children in 1st and 2nd grade was interesting and helped me to be empathetic with the children and the people around me.', '.', '.', 'It was very interesting to be able to live and talk with young people who seek to reinforce their learning, since there was a fluid exchange of ideas of points of view with which all the participants were enriched.', 'In general, I liked participating in this solidarity project, however, I consider that I lack a little support from the partner organization.', 'The initiative is very good, but what is missing is a lot of organization and care with the choice of the EMS that want to obtain the service and that they comply with the sessions that were assigned because there were two sessions that I wanted to attend but already had to give classes during that time and there was no announcement or mail about it.', 'I only had one student who attended the classes but still enjoyed them a lot.', 'very bad organization', 'Putting yourself in the shoes of others impacts perspective', 'I realized that although it is an advance to live the social service experience remotely due to the circumstances of the pandemic, there are things that are difficult to replicate online when one is teaching classes or dynamics with students. For example, technical failures that consume a lot of time, the availability of students due to not having access to the internet, a device, etc., or simply maintaining attention and participation.', 'Since I only had one student, I was able to give her personalized classes and that led us to connect and create a circle of trust', '.', 'It was very interesting to learn about other realities and to be able to help them with even a little for their academic and professional life, and I liked that the EMS told me a little about themselves and their lives.', "The best thing about this experience was building trust between tutor and student. Because normally you don't trust your teacher out of shame or embarrassment that they tell you something. But eventually she decided to do something about it and that bravery to take on a challenge however it is in 1 month is respected.", 'THAT', 'It was a very challenging project as a main tutor at the beginning due to the issue of communication failures and commitment to the EMS, as well as a rewarding experience in the case of my role as an assistant tutor.', 'Excellent project and I liked that it raises awareness', 'Few EMS are the ones that show interest in the project, but the few that participate show that there is a need for academic support and mathematical advice at the high school level.', 'I liked helping students learn, as well as supporting my tutors', 'chat with new people', '- I really dislike teamwork a lot.\n- There was a lot of disorganization and lack of coordination throughout the social project.\n- It bothers me a lot that they, without warning, want to meet whenever they please, regardless of the availability of others.', '.', 'there was a bit of a mess', '.', 'Knowing the history of each horse (its past and how they came to Zamora Inc) is an example of how life gives second chances. And that, just as the horses are rehabilitated with the Zamor

I am very interested in the cause of education.', 'It was quite hard since we lost a week of class looking for people who did not want to be part of the service', 'I think it was good, but there was a lot of disorganization at the beginning and I think the goal was not achieved 100%. In addition, there were problems when conducting the surveys and endearing', 'I really liked being able to help my EMS develop new math skills.', 'Motivation is key, and mutual, by doing homework and participating they motivated me to prepare my classes', 'His attention and understanding was excellent.', 'I believe that, despite being the noble cause, during the pandemic these elements that are sought to be integrated into social services are not present.', 'I was very excited to participate in Aprendamos Juntos but I was extremely disappointed with the experience since I consider that they had a very good idea and intentions but the disorganization affected the entire activity as such; I am not the only participant in this service who feels this way. Sometimes, I have to say, there were certain aspects that I didn't like, but overall it was a good experience.", 'It is my first social experience that I live in summer and despite the fact that the time is less, it was possible to carry out a satisfactory and useful social project for society', 'This social service helped me understand that everyone has different problems and the first thing to do is to understand their situation and try to come up with new solutions and be flexible.', 'I consider that it was a very pleasant experience despite being remote and it helped me a lot to learn new things that will help me in my daily and professional life.', 'I found the purpose of the project interesting.', '.', 'The importance of education in people', 'It was a very nice and respectful group.', 'My experience was very enriching since my only EMC trusted me, we clarified doubts, we spent the necessary time until everything was clear. It is an experience that I would recommend.', 'I think that the project is very useful, especially in the context in which we are currently living, perhaps a little more organization is needed, but apart from that, I think that everything can be very useful.', 'It was somewhat complicated since everything was online and the interaction was more and more complicated', 'I think that the whole organization of this project was a challenge, but I think that with more experience it will be easier each time.', 'I quite liked transmitting the little I know to others', 'I know that there were situations that could not be controlled, however

I had a very good experience and I really liked these weeks, I would even like to put it in another semester:)', 'I really liked it because, by teaching programming to primary school students, I was able to learn from them as much as they learned from me. My favorite part of the project was when at the end of each activity, the students showed me all excited how their application had turned out, since it gave me a great sense of gratification knowing that I contributed to their learning and development.', "Please remove the quizzes. They are of no use. The ethical foundations that they try to instruct are not learned that easily with infographics and that's it. They only serve to put at risk the hours of work and real learning that you have performed. The most selfish and apathetic person will continue to be so with a 100 in all the quizzes, so ethics and social conscience are not taught or instructed.", 'I liked it a lot, I always had accompaniment and I did valuable activities', 'It was nice going over topics I looked at in high school.', '.', 'Despite having only one EMS, learning has been beneficial for both and it has been a beautiful experience. This came to surprise us a bit because at such a young age they found themselves having to drop out of school to start working. Unfortunately, it is normal around them not to continue with higher education for working long hours.', 'I learned to be a teacher and change my role. I worked hard to give my all and apply all the knowledge I acquired during my high school.', 'I learned a lot!', 'I feel that in person would have been a more rewarding experience', 'I would have liked more students to contact me, for my coordinator to assign me as a support tutor and to keep his group informed.', '.', '.', 'It seemed to me that what they do is something very important, since they are really needy people and that their biggest dream is what techo is doing', 'We must continue to close the gap in studies', 'They should give the data of the ems a week before so as not to affect the content of the class', 'That the same could be done with people from other states even if they do not use canvas, I brought my brother and a friend of his to the classes so that they could listen to them even if they were not registered', 'It made me learn more about the situation in which people live in our country, plus I had the opportunity to contribute something to the children of the country.', 'Use some things learned in my classes that were very useful to me in social service', 'I will definitely put it back, I love it.', '.', '.', 'It is important to support Mexican entrepreneurship', 'I really liked being able to share my knowledge with people because I could also reinforce the topics for myself', 'I liked that, when looking at the social service options, these are divided by careers/study area because that way we are more likely to find a project that called us. For this reason, I was able to find this solidarity project and I really enjoyed it a lot and I feel that I was able to learn a lot, both from the content that I handled and from the use of the requested tools.', 'I think they should first have the list of really interested students (not that schools enroll all their students without notifying them) and then assign the necessary number of tutors', '.', 'It was very enriching to live with people who live in different contexts, this allowed me to develop a more complete vision of other people and be empathic.', '.', 'With the students who decided to continue, they were very dedicated and hard-working.', 'Very interesting, to be able to work with associations and really get closer to a positive change and leave our mark :)', "I had many problems in this solidarity project, since it was not well organized and there was a lack of commitment from the students. However, I openly agreed to support EMS when necessary as attending to a responsibility from another location requires a lot of effort.', 'I would like to continue participating, I liked this project', 'My experience was very pleasant, I was glad to be able to contribute to a cause as beautiful as this one.', 'I had never met people with disabilities before, and now that I was able to, I can realize how they come to have problems in their days; besides that it grants new knowledge and the first experience (of many) that I will have in the future.', 'I really liked participating in this project.', 'AJ a good initiative, it can improve for social service in winter but the attention given to tutors and coordinators is somewhat good and its planning can also improve.', 'I love the content they cover, in fact, researching it was very useful for me as well as for my friends and family.', 'I learned to listen and to know realities different from mine', 'I liked it too much and I discovered my taste for giving advice', "I liked the way we met with the SF. The meetings are clear, short and with a purpose. Negative points I've heard about some social projects involve being stressed by long-term mandatory meetings for no specific purpose or just to make an hour, rather than using that time to improve work. In my case I did not go through that, which resulted in a very pleasant experience from which I ended up happy and would like to repeat.", 'I had to carry out small investigations about childhood cancer to spread on social networks and this aroused my interest in a great way, I hope to continue collaborating and contributing to these causes in the future and share this information and raise awareness through art as my main skill and tool.', 'Nothing to comment', 'I really liked being connected with people, looking for solutions, but above all, generating a real impact on the given problems. I consider that food is a topic that is very relevant in Mexico and for me it was important to do my part, providing healthy vegan recipes and financial as well as learning activities.', '.', 'Very nice experience but there was a lack of organization in the assignment of EMS', 'I believe that the most important thing is to mention the part of the communication with the other institutions and how the students ended up with the initiative.', '.', 'The organization and transparency with the tutors can be improved much more.', 'I really liked this experience as it helps you to raise awareness and finally it is an altruistic cause', 'I liked what I achieved with my student', 'This experience was incredibly challenging, because it meant facing the reality that many Mexican students live. The deficiencies in the public educational system speak of the poor preparation of future professionals who will be in charge of carrying out economic activities', 'I loved it, I had really wanted to get involved in a project for some time that had to do with education and was more aimed at young people.', 'I find it an enriching experience for my work and personal life.', 'I really liked it and I hope to be able to work with the training partner again', 'I found the interaction with the partners to be good and this experience has made me value the small acts since our script will serve as content so that the children can continue learning', 'I liked that my EMS were enthusiastic and that they told me that they liked the classes :)', 'I liked it because you can live the experience next to the teachers and see all the effort they make, I also really liked that in ad

I had never had the opportunity to live with one.', 'I liked having other perspectives about online classes', 'I really liked teaching', 'Because the social service is new, there was a huge lack of organization that complicated the project a lot. (Which is to be expected in a new project, but it does create awkward and unsatisfactory situations.) On the other hand, the EMS (students) did not contribute on their part. I had 7 assigned and only 1 answered me, the one who answered me stopped attending in person and I had to record the classes for him.', '.', 'I thought I was going to have more students, however with the student I had I think that it did have an impact', 'None of my students answered, but a boy who was not from my group joined, and he is paying attention to everything', 'I liked it and it encouraged me a lot that the EMS truly showed the desire to learn and grow and I liked the experience that they were learning through my knowledge.', 'It was a very pleasant and beautiful experience', 'In general my whole experience was very good. Something that I would have liked more would be to have focused on my career. Due to the lack of people in LAF, the financial part of the project was removed. Finally, I believe that supporting religious organizations is fi ne, as long as they do not seek to impose a certain type of religious thought through ac tivities on the students themselves, who are not there to tell us what is correct or not to believe. Opportunity area: Review or have better control over which organizations see k support in social service and what activities they give us, since at least in this cas e, reading a story about "loving your neighbor" through a highly Catholic vision, does n ot I see a lot of support for the ODS that they were supposed to support: Health and Wel l-being, and in the words of a training partner: Gender equality; it\'s just not seen.', 'I was really surprised that my student always showed interest in my subject and the top ics that I taught him; although at the same time I was a little discouraged that the othe r 5 students did not connect or hardly connected', 'I liked the experience that I had w ith the social service too much, I feel that I delved into the issues that they provided us and did a good job. I consider very important the experiences lived,', 'I was very pleased with the experience that I lived within the service since I did not know about its cause, and even more so the way in which they attack it', 'It was amazing to work with the same SF again, because we were able to start planning for the next semester.', "I liked it, it wasn't very intensive but I was able to collaborate on something that will be of benefit to me in the future.", 'Excellent experience.', '.', 'The initiative is great because education is the foundation of societies.', 'It would have made it much easier for the students to also know from their schools about this project.', 'I did not have the opportunity to tutor any student, I would have liked.', 'I learned much more than I thought I would learn and I consider what I have seen in said service extremely useful.', 'I liked being part of this experience because it was very gratifying for me to see the development of my students throughout the classes.', 'I was part of a very select community of tutors, where I had the opportunity to open my world to people who live completely differently. Realizing how lucky I am, to be able to live what I live today.', 'I liked being able to be in contact with the people we were helping, since I was able to see the objective of this organization well.', 'I find it very interesting and necessary, especially in the context in which we currently find ourselves.', 'I liked it, only the general organization was a problem, since many students had no idea they were registered until we contacted; the best thing would be that everything was totally voluntary.', 'Personally, I really liked the project. I think the initiative is good but it can have much more impact if it is well planned', '.', 'I really liked being able to help the beneficiaries at least a little', 'I really liked being able to work in different digital areas to be able to complete the deliverables and the almost instantaneous feedback that we received to be able to modify the work to make it totally enjoyable for the OSF.', 'It was a pleasant and learning experience.', 'Despite the fact that it still has many areas of opportunity in terms of organization, I really liked it because I have always loved being able to teach.', 'I find teaching inspiring and an experience that helps you grow as a person.', '.', 'I loved the experience of being a teacher and I recognize areas for improvement that could increase the scope and quality of our impact.', 'I loved seeing my EMS doing his tasks and evidenced that he was understanding the material he was provided. I was finally able to give formal tutorials on topics other than those of my degree. I loved being able to participate!', '.', '.', 'We gave tutorials to the b

More projects like this.', "It seems to me that I broadened my perspective on life and the world, and it also gave me the opportunity to develop my empathy, especially understanding that one person's life situations can differ immensely from another's.", '.', 'I believe that the organization can be improved', 'I find it very gratifying to work with the boys from the camp, I hope to be able to be part of this social service again', 'I did not live the experience as a tutor, but I feel that I lived it because I got to know the context of the education that is being lived and I contribute with deliverables, which I know will reach the hands of those who participate in the project in the future.', 'I really liked the experience, it helped me to empathize and improve my soft skills, by explaining the issues and trying to be as clear as possible', 'It was a very pleasant and interesting experience where I was able to learn to develop different values \u200b\u200band aptitudes.', 'I need to socialize with the EMS to feel satisfied', 'It was an enriching experience, it allowed me to develop skills such as empathy, responsibility, effective communication and creativity. It also helped me develop as a person and put patience into practice.\n\nFinally, I would like to show my disagreement with the management of social service hours. It is unfair that Tec20 is credited with up to a maximum of 120 hours and Tec21 only with a maximum of 100 hours. The work, dedication, time and effort involved is the same; we deserve the opportunity to credit the same number of hours.', 'It was an incredible experience, I am left with the very nice comments that the girls gave us at the end, it was very satisfying to know that our effort served them.', 'I learned that giving tutorials in this social service was not just giving classes, but being there for my students and being compassionate and understanding them.', 'I enjoyed this solidarity project a lot, it was truly an experience that moved me that touched me not only on a professional level, but on a personal and spiritual level, I was able to connect with my EMS, more personally, they told me their concerns and he told me about his experiences, feeling that trust and affection from them fills your heart and makes you feel much more committed to what you do.', 'nothing to add', 'I was able to relate it to my career, since in general the nature of the project is very focused on that area, which is Communication.', 'I liked that even online and at a distance, I was able to connect and empathize with the members of one of the communities with which the training partner organization works', 'Everything was perfect.', 'I really liked being part of the project, it made me learn and learn a lot about the context of the organization, something that managed to develop my empathy throughout the 5 weeks.', 'I love working with children and giving a little of what I know.', 'It is very satisfying to be able to carry out social service putting into practice the knowledge acquired during the semester', 'It was an enriching experience for me and at all times I found meaning in what I was doing.', 'I learned a lot about myself, and developed many values.', '.', 'I learned a lot in this solidarity project, it has been my favorite so far.\nHe gave me a life lesson.\nI liked that the entire integration process was progressive for TEC21.', 'Good project, it would be much better if it was carried out in person.', 'It was quite enriching and different from what is customary to see in this type of experience.', '.', '.', 'I consider that all these aspects are important for this project.', 'The meeting sessions with the person in charge were entertaining. I had the opportunity to learn about the current needs of many young people, and to help a little, and I really liked that.', 'It is a pleasure to be able to provide my services as a professional to a cause. It is always something special to be able to work for social justice, but doing it from your knowledge of your career is phenomenal and I feel that I was able to contribute a lot.', 'The presentations are very interesting and valuable, I think they should be given to all students in general', 'It should be better organized in terms of how to get interested students.', 'It is very cool to work with children and make a change', '.', 'That I met new people and learned about hearing impairment', 'It is of great importance that all students live experiences like this', 'I liked it a lot and it helped me develop empathy', 'Everything in ord

er, it was an interesting experience.', 'I liked that participation was adaptable to our interests as students and even more so that we could contribute something from our experience.', 'It was a very good experience to do something for people who have leukemia and for their families and try to improve their quality of life.', 'I had already given my opinion but they put everything blank again in the questionnaire, the system well', "It made me create a lot of awareness of the current situation and how it worsens with other social issues and it's like a little snowball, it comes together and comes together", 'I really liked my experience and I feel that it was something that could be done in the little time we had but something of great value.', 'I liked the experience of teaching', 'I love the cause they work for', 'This is a different project than normal since I work with horses and not with people, so it was interesting to know another perspective. I like this type of project that seeks to grow organizations that help people.', 'I really liked participating in this solidarity project, now I have a new friend and more awareness and closeness to the issue of mental disability.', "It is clear to me that the effort and/or time was not put into planning the curriculum well for the students. Besides, the monitoring turned out to take more of my time than the teachings because the designed processes were done with the legs. They had redundant, irrelevant questions (such as my opinion on the importance of learning), repeated, and never related to important things such as the areas of opportunity for students.\n\nWhy do I have to plan and then document the sessions?!?!\n\nHow useful is a diagnosis of four questions for algebra, four for geometry, etc.?? I'm pretty sure they were multiple choice because all of my students got twenty-something percent off and had no idea what they were doing. They should have gotten a 0!!!\n\nMy experience was disappointing and not only because of the lags of the students. It seems to me that management needs to reassess its competencies and methodologies if it wants to have a real impact in the future.", "Online it was a bit of a sad experience as we didn't have direct contact with the participants and the community. But I am satisfied that our work can help improve the quality of life of people in the community.", 'It was interesting to do a job instead of a proposal to present, I feel that it allowed me to develop more fully.', 'I really liked this solidarity project because it was something different from the previous ones in which I had been. I had to work "alone", that is to say, without colleagues from the tec, but it was an enriching experience for me in several aspects.', 'I really liked the experience of giving advice, however, with a group of students who wanted to have participated voluntarily or at least because of the obligation of the school, our help would have been much more significant.', 'Knowing that the time and knowledge that I have been able to acquire can be of benefit to others is very gratifying.', 'In general, I really liked this experience since personally I had no idea how it was possible that so many topics could be related to each other.', 'At first I entered the social service to meet the hours, but when I did the activities with the boys I realized that I was really learning and having a great time. I would like to participate in this social service again.', '.', 'It was very interesting to collaborate with all the issues with which the organization works.', "I liked being part of people's knowledge", 'I would have liked to contribute more, the person in charge of the institution that touched me did not have much communication, which meant that there was not much interaction and work', 'I liked everything, the intention of the project, the help they gave us and above all, making us work for a good common cause.', 'I learned a lot in this month. And what they proposed in the offer at the beginning of the summer was what was done.', 'I think they are enriching and perfect experiences to grow as a person and help society.', 'I loved it, they make you feel that what you do matters', 'I will continue my friendship made in social service', 'Without a doubt, I would

include this solidarity project again, it is very interesting to see how with what you know now you can help others, from making simple tutorials on how to use a platform to undertake.', 'I learned about issues, problems and needs that other people have that I was not aware of. It was a very interesting experience.', 'I really liked being able to work with Almenara, because I like the mission they have.', '.', "It's nice to have new friends", 'A very pleasant and valuable service to perform, it would only improve the meetings with the training partner if they were more frequent or had better feedback and accompaniment.', 'It was very nice, I liked living with girls with disabilities, playing and having fun <3', 'It was a very positive experience and it encouraged me to lose my fear of talking on the phone in long calls with strangers.', 'This social service allows us to learn more about the situation of other people and help them in any way we can.', 'I really liked being able to participate in this project, very interesting and thought to help', 'Great job by CONAFE to help students get ahead.', 'The social cause that is being pursued seemed very important to me and I believe that it should continue, but improve communication', 'It was somewhat disappointing not being able to have the full experience with EMS, however it was a good experience doing the project activities', 'Everything went very well, I just think that students should have a different perspective in terms of classes, and be more open to learning', 'Hopefully next time I can receive more advice for the use of new tools for the development of activities', 'Little organization, student tutors with no idea of \u200b\u200bwhat they were going to do', "The experience of being able to transmit primary school knowledge that I had in a high-level private school to children who don't have the opportunity and the blessing of having it was incredible. I think that in addition to the fact that I took advantage of this great privilege that my parents gave me, I was able to take it further by creating the didactic manual. The Tecnológico de Monterrey gave us the opportunity to give a better education to a group of children who will be blessed with our manuals.", 'I liked the follow-up and the way of interaction between the training partner and one as a student', 'We all contribute to the culture of legality', 'I feel good for helping even if it is a person in their studies and who has the pleasure of continuing studying.', 'I loved the experience but I would have liked it to have been face-to-face.', 'Very nice experience and I would like to participate in Autism ABP again', 'I was able to appreciate the teamwork when it came to showing the deliverables. I would have liked to form my role as a tutor and be able to explain some specific experience to them.', 'It does not seem right to me that they have notified us last week, that if the paperwork of all the people we registered by Friday the 29th is not delivered, we will not be credited for all the hours. Everyone is on vacation and there are also problems with the stationery which is not in our hands. It seems unfair to me that we are not credited with the people who will carry out the entire process days after Friday the 29th.', 'I really liked the project but there is no lack of organization, it is a good social project and this was the first time it was carried out', 'Although it was for a short period of time, I feel that we really did a job with which you can grow in the medium and long term.', 'I liked going back to teaching. It is something that I really enjoy but the problems that arose at the beginning of the project I think made things a bit difficult in addition to the fact of the quarantine and the Covid 19 that does not allow interaction in the same way.', 'It was very gratifying to meet wonderful people willing to make the change.', 'I really liked this project because it helps the environment a little', 'It was very enriching to be able to directly impact the lives of high school students', 'very pleasant atmosphere', 'Readings and tasks in Canvas are very different from what one actually works on, they seem like two different subjects and the removals and activities in Canvas seem unnecessary.', '.', '.', 'The truth is that there was a lack of organization on the part of the organizers. To begin with, they should have informed the students about the tutoring, then contacted them and asked for the letter of consent. It seemed wrong to me that they left this responsibility in the hands of the tutors, since it took us a long time to start the tutorials and some were not interested in participating. In the same way, the fact that new students were assigned every week made it more difficult, since there were some who were outdated in topics and had to be repeated several times. Lastly, its system of assigning students according to the placement exam was very bad, since some students had worse results in the subject of mathematics and were assigned to the subject of communication.', 'I learned about the experience of being a tutor and how I can better understand students, something that I think will help me in the future.', 'It is very cool that they teach you about social responsibility and not only about the project you are going to work on.', 'I really liked the flexibility we had in our schedules, since it allowed us to always be up to date and take advantage of', 'I liked the meetings that were held, it was a good experience', "We try to keep a context, but maybe there are several that we didn't include or realized until

later.", 'My experience during the project in general was very enriching and positive since I consider that the teachers did a very good job guiding us and explaining to us the necessary elements so that we could develop quality work and truly help others.', 'A small company but with great achievements and a long way to go, we were the 1st group but I think there is a lot of potential to help that we can offer an organization of this type :)', 'It was nice to support good causes', 'Incredibly enriching.', 'Very satisfied.', 'It was an interesting experience in which I learned many things.', '.', 'I really enjoyed participating in the project, despite the problems that arose, I consider that it is a project with great potential.', 'In these last 5 weeks, I have learned a lot about resilience.\nand about how this program helps young people, boys and girls in situations\nvulnerable, by endowing and stimulating them with skills with which they can\nhave a better future. I think that resilience tutors have a lot of potential to generate a positive impact on the lives of children and young people in vulnerable situations.', 'A great experience.', 'I really liked the project and the meetings seemed very agile to me, I only would have liked to have been more formal with the time, but in general a very good experience since they allowed us to contribute and develop the project with great freedom', 'I liked that the students have had the commitment to attend, personally, I would teach the course again', 'I feel very happy to have helped and I hope I have changed the life of the student I tutored for the better.', '.', 'The project I had with the OSF was very interesting, it was a subject with which I am not very involved in my daily life, but it made me aware of this specific subject, which is autism. I find it interesting and good that we can help people who need it the most, and it is good that we have contact with the OSF so that they can have feedback and projects can be developed in the best and most efficient way.', "I don't have much to contribute, since I hardly had any interaction with EMS, but I must say that I learned to see something good in the bad because despite not giving advice (only two) I learned other things like preparing classes for online formats, which was something new for me", 'Great initiative that the OSF carries, I am thinking of staying within it for the next semester', 'During this experience I was able to be in contact with students from Monterrey and I learned that they are all subject to very particular life situations and that a very important value in this project was empathy and commitment to be able to make these children improve and motivate themselves to continue with his studies', 'I was interested that we worked in pairs and not in teams of more people, but at the same time it was good to focus specifically on one area in order to get more focus on the subject.', '.', 'I really liked learning about the communities and the problems they have. Meeting with my team to discuss the problems helped us a lot in finding a solution.', '.', 'I have unlearned and I have taken new concepts and questions to work with myself. What I experienced in the meetings, readings, and working hours with my colleagues, directors, and associates is something unchangeable. The pandemic has made it difficult but not impossible. If you really get involved in something, you can awaken wills and make changes to yourself and your surroundings anywhere. This is what I take with me from the Service, the experience is in me now, and when I least felt it, the work time had ended, but not the communication.', 'The entire social service group was very kind and patient for those who were first time with the group.', 'What I liked the most was the possibility of hosting a dog in your own home before it finds a family.', 'It was a very cool experience to participate in this solidarity project', '.', 'I really liked staying with this NGO, you can learn a lot', "The cause is very good, being able to give advice and classes to people who have difficulties for free is a very good opportunity, however I believe that those in charge of the project did not carefully analyze the beneficiaries due to the problems that occurred in which the EMS did not want to participate, it was obvious what would happen if the majority did not even know what they were registered for. In addition, the fact of continuing to have classes after having gone on vacation is something that many do not like because of the stereotype created about school, but also because of complications and personal needs that range from illnesses or delicate situations and even work as well.\nYes, it is a very good opportunity for them but there are many factors, the project MUST accommodate, be flexible and understanding with the student and not the other way around, it MUST satisfy their needs, the objective itself is education but above all that which have value and relevance in people's lives, you have to work on the way you communicate with them, on the options they give and, above all, on the contents. Probably these will now be used for a university exam but passing a year, if they dedicate themselves to something different, it will have been of no use.\nI believe that the cause is good but they still have things to cover, if you want EMS to be integrated into the project even on vacation (after having left school and being able to take a longer break even when you have personal problems) you must have more value the project, otherwise, it would probably be more appropriate to act within the

ir school cycles in my opinion.", 'This experience was very good and enriching, it helped me grow as a person and develop my leadership skills.', 'It was a great experience, which made me understand the difference between creating a positive impact and getting involved just embellishing the problem.', 'The work team was very friendly at all times, my experience was very good', '.', 'Due to the nature of the social service mission, we can not be in contact with vulnerable sectors; however, we were doing our thing to empower them in one way or another', '.', '.', 'I liked all the activities.', 'I liked what the PLAN organization does and I learned a lot during the summer. In general, I liked the experience I had with the social service.', 'I liked how I can work in all of Mexico', 'one of my students was very open with his learning problems and I liked that I was able to help him understand math topics that were difficult for him before', 'Completely satisfied.', 'Next, put that experience in 3d modeling modeling is necessary', 'I believe that the deliverables are based on responsibility, honesty and empathy towards young people. Where they sought to improve their quality of academic life and strengthen educational systems', 'Everything very beautiful. Complete activities and add the excellent work of the person in charge because she was always on the lookout and gave us good feedback and gave us suggestions on how to improve.', 'In general, the experience was great, being able to support this need on the front line feels good, and you know that you are doing a lot not in quantity, but in quality.', '.', '.', 'Having taught online classes gave me a different perspective on what I thought being a teacher meant (it implies not only having knowledge of the subject to be taught, but also having social skills and values \u200b \u200bthat facilitate/improve interaction with students). I appreciate having had the experience, as well as the opportunity to contribute something to the chic@s.', '.', 'I really liked that this was my first social service, without a doubt I will be happy to continue directly supporting the good of the community.', "I liked it, it just didn't seem to me that if the child doesn't show up for class, you still have to make it up.", '.', 'I liked the theme and what it deals with, the coordinators are very accessible. But in the end the deliverable was very heavy', '.', '.', 'I liked that support classes were given to students who had bad grades in the areas they studied.', 'It has been a very valuable and gratifying experience, I have personally improved a lot and, especially, I have been able to be part of the help that has been provided to all the beneficiaries. I am very grateful for the work done by the OSF, since this kind of initiative is those that have the potential to generate real changes in the country.', 'I liked the dynamics we had for the elaboration of the project, I consider that the fact that each person contributed in a specific area was very efficient.', 'I really liked knowing how the community lives', "It was interesting and entertaining, plus it's nice to know you made a positive impact.", 'I have been delighted to have participated in this tutoring program, it fills me with pleasure to be able to contribute to the academic development of young people since they are the future of our country', 'I would have liked my tutors to be more active and respond to my messages from the beginning.', 'Do not involve canvas with the solidarity project, because it looks like matter and it is not a matter. I really liked the communication and feedback we received :)', 'I love all! As the activities were organized, the sessions were not so extensive because what was necessary was discussed, fair and necessary feedback to continue improving!', 'The quizzes are very ambiguous and tedious.', '.', 'I think the idea is very good, but a little more organization is needed so that we can have a greater impact', 'I really liked working with a totally different project than what I had done before.', 'Overall it was a very enriching experience. Perhaps something to note is that it seems to me that the days of implementation in which we interact with the guests of the c

amp are few, and it could be an even more memorable experience for all those involved if it were extended for a couple of days.', 'The teacher / training partner helped me and was very understanding personally with me with a personal situation that I do not want to comment on, but she helped me with the times for delivering the quizzes, etc.', '.', 'I really liked giving the advice and seeing the interest of some EMS', '.', 'This was an excellent experience that made me grow as a person, but I think they put a lot of freedom in the hands of the volunteer teachers, especially regarding the topics that will be covered in class. Excellent attention from the coordinators, I was very satisfied.', '.', '.', 'I feel like we could do more considering the circumstance and all.', '.', '.', 'Great', 'It is a very enriching experience and something demanding that I liked to know', 'I liked that in my case we had a government regulation as a guide and from there we created our project.', 'Excellent community service.', 'I would like the OSF to become more actively involved with the EMS next time, since communication and assistance from them took a lot of effort. Since the project is just starting, I think it went pretty well overall.', 'I found it very interesting to have the opportunity to live with young people from a different socioeconomic class than mine and to be able to contribute to their academic training.', 'Due to the health crisis, it was difficult to interact more easily with the targeted public, but thanks to the socioformer we were able to make a great deliverable.', 'Knowing the subject of resilience more thoroughly and reflecting on myself to be able to translate that into my life and in others seems to me something very big, very fascinating. It is the first organization that I know of that does that and I hope to be able to participate again and help and support these types of organizations more. I think that in this type of subject you start first with yourself.', 'I would have liked it to be in person, but it allowed me to somehow get involved and become aware of the situation that I was unaware of', 'I could not live the experience to the maximum because I did not have students all the time', 'There are many aspects to improve.', 'I really liked carrying out the knowledge learned so far in my career, and knowing that I am doing my bit to support an association like HIC ME.', '.', 'I liked that despite the inconveniences that had to work together as quickly as possible to move forward with this project and achieve the desired objectives.', 'I really liked being able to live with young people of about my age, but who came from another socioeconomic class. Getting 10 people willing to donate stem cells, much more in such a short period of 5 weeks, was too sensitive for me, so the people I registered did so to help me and not because they really wanted to donate stem cells. I have nothing against the organization, I consider that what they do is something very nice and it is good that there are support networks for people in need of stem cells, my opinion is more about how the service was organized in a block of 5 weeks and what was asked of me to be able to conclude it.", "It seemed like an experience that gives me knowledge and skills that don't have much to do with my career, but they add a lot of value to me.", 'I found the experience very interesting and it is definitely something that motivates me to keep going.', 'I enjoyed it a lot', 'Interesting with a good final reflection', 'Thank you very much for the opportunity to participate, I congratulate the organization and more because it is made up of students', '.', 'The interaction with the children was better than expected, they were active and efficient in doing their work.', '.', 'It would be nice to have slightly more challenging activities.', 'Understand that not everyone has the same thing and you have to be patient/empathy with people', 'I already want it to be face-to-face', 'I would have liked to wear something more related to my career', 'Being present with children and providing support makes you seek to be a better person.', 'Since I was in high school I have liked advising peers and I have been doing it since then until the start of the pandemic, this service allowed me to revive that by advising students and I think I have done a good job.', 'Very complete social service with purpose', 'It was great to be able to do this to be able to help and support children', 'I really liked the dynamics with all the volunteers and the children, and the impact we make with our work in society.', "I really wish they had given more meaning to the deliverables rather than getting hours. So simply a whole grade team could make a video and take turns each week. But for some reason multiple videos are made on the same topic. Honestly, I think it's a very useless thing and videos could be made for better reasons than just getting hours. The deliverables felt like an excuse to get social service hours, and personally for me there was absolutely no inspiration to do them because it was something that had no use towards social service and just seemed like bad design/lazy design to me. So many restrictions to make a video, with their respective rubric and also the topic that was explained in the videos was eventually explained in class. Having an absurd amount of videos of the same content has no use at all, therefore I think it is a bad design and this needs to be reformed immediately for the next semester of UPA.", "This experience was very interesting, although sometimes my internet won't let me give my entire class.", 'Personally, I only had to deal with three students since not many connected to classes.', '.', 'I liked being able to live with the children', 'I really liked the experience', 'I really liked it and I would like more students to participate.', "I think doing experiments and showing them to children is a way of sharing learning and it's very cool to be able to do this.", 'I consider that it was a great experience to have been part of this project and I would like to continue in it, because the love for science is something that must be shared:)', 'Very interesting and fun to be able to teach our knowledge and experience in Chemistry to the teachers! All this opened my eyes to the sense that this type of organization has to be supported in order for the people who need to be trained to get ahead.', 'The truth is that we were not doing what was described on the social service page. In the end, the training partner organization had many projects and we helped in all of them, but there was not much organization and we never had contact with the beneficiaries.', 'It was a great experience.', 'Very bad experience, the person in charge of the VIFAC organization was rude to the entire social service team, so everyone began to unsubscribe, there were no schedules available for the meetings, it was either you come or you unsubscribe even if I had my face-to-face classes At that time, I got desperate very quickly if things were not exactly the way I wanted them and it is somewhat difficult because we only had 1 session after learning about my training partner organization, in general a very bad experience.', 'It caught my attention to see up close how society reacts to a pandemic and how they behave together to react.', '..', 'For the last project. From giving our personal telephone numbers to talk to the students, sometimes they responded in an uncourteous way to making us go to unsafe places to carry out the institutional project. On the other hand, those in charge of the ss were always very attentive to everyone, but I think they should set limits. I had to attend once a week to carry out my institutional project, which I am not complaining about, but what I did not like was that at first they "recommended" us to travel by uber since the area is unsafe and there are cases of heist. First of all, I did not like at all having to expose the members of my family to take me to said place and when leaving, in fact the place was perceived as quite unsafe. I understand that it was part of my commitment to meet my hours but perhaps they should rearrange the locations. Within iris an address was specified in which I thought it would be there, so I agreed since I knew that area and it was close to me. However, in the place where I ended up, it was the opposite. I also recommend that you explain well what the service consists of since what IRIS said was nothing like what I ended up doing. I think it is super important that children are interested in learning, and I think that with how dynamic the classes are through these tutorials, it was possible for the children to learn, have fun and want to continue having classes. In addition, something that I liked was th

e trust that was created with the children and their parents, and that they both felt confident to talk to me and contact me if necessary.', 'It is a little demanding but it is worth knowing that you generate an impact on the children', 'As LSH I had a different experience than the students, since my function was to accompany, however, I consider that much should be improved to be able to involve the students in a more direct way and not be so monotonous.', 'It is a unique feeling to share your knowledge for the benefit of other people', 'I found it quite dynamic and also very knowledgeable, since I learned about how people think about their security.', 'I would also like to have the possibility of having a zoom meeting with those in charge of Canvas of the Solidarity Project, to clarify doubts about certain activities.', 'I really liked it and I was able to develop many skills being part of this project', 'I really like the cause, I would like the project to start a little before the time to be able to carry out the activities, but in general the initiative is very interesting', 'Despite the fact that my participation did not have tangible results, searching for data on the condition of the states in NL led to correct decision making', 'In general, my experience was very satisfactory and for this reason I want to congratulate the training partner since he provided the necessary tools to make this possible.', 'but contact', 'It takes a lot of organization of time, but it can be done.', 'I really liked teaching children since I feel that I could really help them learn and besides that you can learn about them and their tastes, and I am sorry for having been able to meet them since even though the classes were virtual I was able to get to know a little about them.', 'Very good experience to share my knowledge with future generations', 'I never had any doubts about what was happening or what I had to do, the planning was impeccable.', 'It was a lot of learning', 'I really liked the participation of the coordinators and their feedback, as well as answering any questions we had, but something I want to mention is that there was a lack of communication among the neurosurfers, along with the autistic people, and perhaps meetings to get to know each other because not all of us knew each other. . But I really liked what was done.', "It was a gratifying experience, it is clear that the training partner organization is just starting but they have a great vision for the future and have a lot to teach people and above all a desire to help. I really liked the three activities that I did, and I would have liked to do the one to clean the La Boca river, but I couldn't attend on those dates, but you can see that they have a very nice community.", 'Mainly managed the entry of new members to the committee and supported them with onboarding.', 'I really liked the program.', 'The experience was quite satisfactory, honestly it took me a lot to agree with the person who was my tutor, I didn't always have the time, our activities didn't match, obviously it was also my fault, with work and school I didn't have the planning, but Obviously I tried hard enough to make things happen. I liked the way we shared topics, the way we gave each other feedback, it wasn't always the right one because we had 30 minutes to do it, but it always flowed the right way.\nI loved being able to give a little of my knowledge, teach something that I knew and not feel judged that "you don't know the subject well", if not that it was hard for me, they listened to me and gave me tips on how my presentation could be better about the theme.', 'It was quite interesting to learn about inclusion and understand the important role it plays in our society.', 'I liked being able to have my first experience in social service, but honestly it was very heavy for me to take it together with my semester. It has probably been particularly my OSF, but I think it does require a lot of dedication of time and effort. Without a doubt, it is very enriching and I loved being able to have that contact with my students, however, it does consume a lot of time and compromises other areas of your student life, such as LiFE. I think the workload should be reduced a bit or the number of hours received should be increased, once again, in the OSF of which I am a part.', 'I really liked teaching children who are excellent students and seek to learn', 'It seems to me that the format of the mentoring program is very well designed', 'My experience was very interesting, and I had to assume a different role from the one I normally represent, with different responsibilities and work methodologies.', 'I really liked the experience since I feel that it contributes to eradicating a very real problem and that it is of the utmost importance to attend to', 'Sharing a little of your time can help children a lot and make them spend very happy moments. I honestly feel that the children helped me the most because they reminded me of the importance of purity, expressing emotions and having a positive and vibrant attitude towards the world.', 'I really enjoyed being able to contribute to such an important cause and seeing how the students were improving and acquiring more knowledge that will help them in the future.', 'I really liked it since in addition to contributing to society in terms of promoting financial inclusion, I liked the work format because they did not fill us with activities and even so we were involved in the scheduled activities', 'There was always good organization, the managers were always very attentive. I like

Other universities give more hours for a single group because it really involves a lot of work and time. When starting the social project, many people decided to leave because they do n't really reward us for the amount of work we have to do in this social service. The people who stayed were because we had no choice as we had to end this semester with our hours of service, but if it weren't for that many more people would have left, I'm sure of that. I had to take two groups to get 120 hours because I had to complete 80 hours by the end of the semester, so the workload was double and it's really a lot of work to only get 60 hours per group. You use a lot more than 60 hours for this.", "It is very interesting for me to innovate in education to promote methods that are effective and within everyone's reach", 'It was very interesting for me to be able to teach, since it is something that I had never done in my life, so I had the opportunity to learn skills that will help me in the future.', 'I really liked the purpose of the project', 'Different experience of helping companies', 'Gracias', 'It would be much easier to do more exercises in which the children have more fun if the AENL could provide us with a little more material, since the school does not have so many materials.', 'happy to be part of a positive change', 'Personally, this social service gave me the opportunity to continue my development as a person practicing in areas in which I had never worked. l service tried to increase the engagement of CIBRUC, forcing the students to disseminate publications that often did not have exact or true information. The social service did not contribute at all to the idea mentioned in the project description; They should specify that it is about growing an organization that does not have a well-established app on social networks, but they expect them to spread it anyway. I am very disappointed in the service and I hope they improve the descriptions so as not to give false hope of what will be done if you sign up.', 'Interesting experience together with the organization and the participants in it.', 'I am surprised that this program is not open to more public, since there were several occasions in which neighbors of all ages came to ask if they could also sign up for music classes. I believe that they too have a right to art education and their interest should be celebrated and encouraged. The teachers and teachers were always very kind, and I felt all their support.', 'I felt useful and happy to belong to a social service like this', 'I felt very happy to belong to such a beautiful and noble institution. I admire all the staff, and their teaching methods.', 'I had the opportunity to work on the content of the materials and they are very important topics that need to be shared. Categoría: tiempo

- Lo único que me desagrado del servicio fue la falta de colaboración de mis compañeros de equipo, ya que pocas veces asistían a las reuniones con el socio formador, no participaban en el desarrollo del reto y no cumplían sus partes del trabajo a tiempo.

Me entristeció ver la falta de motivación y empatía de mis compañeros al trabajar por un a causa social. Creo verdaderamente que se debe de hacer algo al respecto

- Las actividades en Canvas son absolutamente banales, inconsecuencias y por lo general, un gasto de tiempo y recursos. No contribuyen nada a la experiencia del servicio social y solo sirven para poner en riesgo la validación de el tiempo que hayas compartido con la organización, y posiblemente a los ojos del Tec, haber hecho nada, aunque en realidad eso hubiera sido lo opuesto. Los quizzes son tediosos, el material es redundante y esencialmente es una gran obviedad (especialmente si has llevado una optativa de ética o filosofía, requerimientos ya de graduación). No debería haber nada que hacer en Canvas, el servicio social no es una clase de matemáticas.

- A pesar de que fue corto el tiempo, si se logró tocar los temas a profundidad

- Me gustó el contenido que ofrecían en Canvas, sin embargo creo que hubo una mala organización con la organización socio formadora. No me sentí muy involucrado y tuvimos muy poco contacto con los encargados del proyecto.

- No me gusto mucho el trato del socio formador, era más una relación de jefe-empleado y pues se sentía la presión todo el tiempo de trabajar. Parecía más una materia y no un proyecto que podríamos aportar.

- No hubo gran interacción con la OSF, nos pidieron ciertas actividades por Whatsapp pero jamás hubo ninguna interacción por videollamada u otro tipo. En varios momentos el grupo si se encontró un poco perdido en que hacer y que se esperaba de nosotros.

- Entiendo la situación de los alumnos, pero desde un principio se les debió de dar algún tipo de curso o inducción para que entendieran el programa y solo aquellos que de verdad quisieran, se metieran. Hubo mucha confusión y pasó todo muy deprisa con poco tiempo de planeación.

- La verdad me gustó y me agrada el objetivo del proyecto. Pero sí está un poco triste que prepare tu material y tu clase y luego nadie se conecte :(

- Creo que un área de oportunidad en este proyecto es el tiempo y la organización. Poder tener una mejor organización antes de que inicie el proyecto ya que se perdió mucho tiempo en el contacto de los EMS más es inicio para dar asesorías. De por si el tiempo que se nos da para abarcar todos los temas es medido, el hecho de haber perdido tiempo reduce el poder dar algo de calidad.

- Me di cuenta que aunque es un avance a vivir la experiencia de servicio social a distancia por circunstancias de la pandemia, hay cosas que es difícil de replicar en línea cuando uno está dando clases o dinámicas con alumnos. Por ejemplo las fallas técnicas que comienzan mucho el tiempo, la disponibilidad de los alumnos por no tener acceso al internet, dispositivo etc, o simplemente mantener la atención y participación.

- Hubo un poco de desorden

- Fue un poco insatisfactorio, porque los EMS que me asignaron no estuvieron interesados en participar, a excepción de uno, pero la 3er semana dejó de contestar y nunca mandó las actividades correspondientes

- Para nosotros tutores fue común que algunos de nuestros estudiantes no se presentaran a clases por diversas situaciones, ya sea porque el horario de clase coincidía con su horario laboral (a pesar de tener amplia flexibilidad para las sesiones de clase). Esto no sorprendió tanto debido a que a tan poca edad se vieren en la necesidad de dejar los estudios para ponerse a trabajar. Desafortunadamente, esto normalizado en su alrededor el no continuar con estudios superiores por trabajar largas jornadas de trabajo.

- Fue el trabajo justo para el tiempo que tenía

- No la conocía, sin embargo ha sido una que más me ha llamado la atención antes y durante el tiempo que estuve involucrada.

- Fue un poco difícil la comunicación con las personas que estaba ayudando debido a la falta de tecnología.

- Mi escrito de demanda lo tengo que aplazar a la siguiente semana debido a que el cliente no había tenido tiempo anteriormente de una sesión de interacción por zoom.

- Aunque haya sido por un periodo corto de tiempo siento que en verdad hicimos un trabajo con el que se puede crecer a mediano y largo plazo.

- Me gustó volver a dar clases. Es algo que disfruto mucho pero los problemas que surgieron a inicio del proyecto creo que dificultaron un poco las cosas además del hecho de la cuarentena y el Covid 19 que no permite que se interactúe de la misma forma.

- He desaprendido y me he llevado nuevos conceptos y preguntas para trabajar conmigo mis

mo. Lo que viví en las reuniones, lecturas y horas de trabajo con mis compañeros, directores y asociados es algo incambiable. La pandemia lo ha hecho difícil pero no imposible. Si uno verdaderamente se involucra en algo, puede despertar voluntades y realizar cambios sobre sí y sus alrededores en cualquier parte. Esto es lo que me llevo del Servicio, la experiencia esta en mí ahora, y cuando menos sentí, se había terminado el tiempo de trabajar, pero no la comunicación.

- En general fue una experiencia muy enriquecedora. Algo a notar quizá, es que me parece que los días de implementación en los que interactuamos con los y las invitad@s del campo son pocos, y podría resultar una experiencia todavía más memorable para todos los involucrados de ampliarse un par de días.

- La maestra/ socio formadora me ayudo y fue muy comprensiva personalmente conmigo con una situación personal que no quiero comentar, pero me ayudo con los tiempos para las entregas de los quizzes, etc

- No pude vivir la experiencia al máximo por que no tuve alumnos todo el tiempo

- No me gusta el contenido de Canvas, siento que nos quita tiempo que podríamos empeñarnos en más actividades con la organización.

- Me pase más horas aprendiendo a hacer lo que querian que hiciera que trabajando en mi proyecto, siento que mis habilidades fueron un poco desperdiciadas pero bueno, ya no importa

- Una de las experiencias que viví fue el tener que desconstruirme como ser humano. Tuve que hacer una actividad sobre cómo mantener una higiene personal. Para lo uno se le puede ser muy sencillo y sin tener que buscar una instrucción sobre cómo lavarse los dientes, bañarse, rasurarse para otros si puede ser un poco más complicado de poder entender y lograr.

- Una organización con buenas iniciativas pero que es poco asertiva para compartir resultados o retroalimentación. Hubieron momentos en los que la falta de comunicación afectó no sólo al desempeño de los alumnos pero a la coordinación de los proyectos en general. No recomendaría que vuelvan a ser una OSF en el TEC.

- Es un poco complicado hacerlo sin experiencia previa

- Un poco cansada.

- Las preguntas de los quizzes más allá de evaluar aspectos relacionados con el objetivo principal, terminan siendo ambiguas, redundantes y poco entendibles

- Empatizo mucho con la causa, pero creo que si era un poco más demandante que otros proyectos.

- un poco tediosa por ser en línea

- Los niños eran bastante tímidos, en esta etapa es un poco difícil conectar con ellos y a que siguen siendo muy jóvenes, pero con el esfuerzo adecuado siempre es posible

- Falta un poco de organización en cuanto a la gente que asiste a las sesiones.

- Fue un poco complicada

- Fue complicado acomodar mis tiempos, sin embargo, al ver que los niños aprendieron y crecieron a comparación de cuando los conocimos fue lo que hizo que valiera la pena el esfuerzo.

- Muy interesante el servicio social falto un poco de organización pero eso fue causa de las restricciones que se tenían por covid lo cual dificulto la participación

- Me di cuenta que la educación realmente es limitada y por eso es muy importante el compartir el conocimiento para así poco a poco ir acabando con el analfabetismo

- Me hubiera gustado acercarme un poco más de manera presencial. Lamentablemente la situación no lo permitió.

- El objetivo del proyecto me parece muy importante, los recursos y plataforma son de mucha ayuda, pero considero en la materia de matemáticas se pueden reducir algunos temas a lo requerir más tiempo para ser vistos. Considero también se pueden incluir tutorías personalizadas para los temas y dudas específicas de cada EMS.

- Me dio la experiencia de estar del otro lado del proyecto en el manejo de tiempos y recursos.

- Muchos de los estudiantes no sabían que estaban en el proyecto y no conocían nada acerca de la plataforma o del objetivo del proyecto, creo que hace más falta darles más explicaciones sobre esto y tampoco encargar tanta tarea porque ellos lo toman como una carga extra y dejan de asistir a las asesorías.

- El poder conocer un poco más a fondo la organización me dejó muchas enseñanzas de vida, que difícilmente se pueden aprender teóricamente. Creo que logró ser una experiencia enriquecedora a nuestra persona.

- Fue algo estresante que los alumnos poco a poco iban abandonando la clase hasta que eventualmente nadie asistió.

- Fue un poco tedioso

- En mi servicio social hubo muchos eventos donde experimente muchas experiencias y emociones. La principal para mi fue la brigada de reciclaje donde me di cuenta que se ocupa mucha organización para desarrollar un proyecto como ese y sin buena planeación y organización puede llevar a mucho caos. Me di cuenta que es muy importante organizarse, ya que no solo estas usando tu tiempo sino el de los demás.
 - Aprendí a tejer un tapete oaxaqueño, algo que nunca me habría imaginado. Esto me hizo aprender un poco sobre el proceso y me hizo querer comprar un telar oaxaqueño tejido por un artesano
 - El punto que manejan para apoyar me parece algo necesario, ya que con el paso del tiempo estas problemáticas que atienden se volverán más recurrentes y es tiempo de erradicar las
 - La experiencia a pesar de ser en tan corto tiempo, pienso que si abarcamos muchos temas
 - Creo que los quizás que se realizan en Canvas son innecesarios y representan una pérdida de tiempo.
 - Tener un tiempo límite para las reuniones, porque muchas veces podía. Durar mucho y otras no tanto y se complica un poco la organización
 - Es una experiencia muy padre ya que aprendí muchas cosas pero la organización socio formadora es un poco desorganizada, no tienen muy claro lo que quieren con su pagina web y nos exigian mucho en poco tiempo ya que eran proyectos muy largos y esperaban que estuvieran listos en un periodo de tiempo muy corto.
 - Me ayudo mucho a entender la necesidad de otras personas, y cómo solo poner un poco de nuestra parte para formar parte del cambio si logra conseguir objetivos.
 - Estuvo muy bien la dinámica. Pero si me molesto la regla de que nadie debia usar shorts "por nuestra seguridad", pero aun así varios niños llevaron un día y no le hicieron nada. Pero que hubiera pasado si fue una mujer? nos hubieran regresado? De igual forma me parece incongruente que es un servicio social, un voluntariado y nos pidan dinero para donaciones como obligatorio. Creo que es algo que debería reestructurar el tec, antes de hacer colaboración con los servicios sociales. Estamos ofreciendo nuestro tiempo, no para que nos cobren un cuota y después digan que el dinero era para donaciones.
 - Creo que lo único que estuvo un poco mal era el transporte, ya que lo consiguieron hasta las últimas 2 semanas
 - aunque llega a ser demandante, logra cumplir con las horas en el tiempo establecido
 - Me gusto mucho conocer a diferente gente, no solo de otras universidades pero también con discapacidades diferentes a las mías. Lo único que me molesto un poco fue que la ubicación era bastante alejada del Tec y además que el costo del programa nunca fue especificado antes de la inscripción.
 - Consideré que el proyecto demandaba demasiado tiempo
-
- Creo que había momentos en los que los beneficiarios podían aburrirse, mucho "tiempo muerto". Pero en general fue una experiencia enriquecedora.
 - En lo personal, me ayudó mucho con mi manejo del tiempo y mi disciplina.
 - Un servicio social el cual tenias que dedicar tiempo y pensar una manera de conectar con la gente para transmitir ideas, principalmente la empatía
 - Debido a complicaciones de tiempo y comunicación de la misma socio formadora, no pudimos cumplir correctamente con las actividades
 - Algo difícil ya que implica mucho tiempo, mas de las 60 horas
 - Considero que hay que tomar en cuenta la carga de trabajo dentro del proyecto, pues a veces es mucho trabajo para la cantidad de tiempo que tenemos.
 - Me marco mucho el hecho de que nunca me había inscrito a un servicio social que tuvier a niños pequeños y al darme esta oportunidad aprendí muchas cosas tanto positivas como negativas y saber que no solo ellos aprendieron si no yo tambien. Sin embargo, un area de oportunidad para el servicio es la transportación que llevaban a cabo al ser trasladados a los centros, debedrian permitir dejarnos llegar por nuestra parte e irnos igual, porque era mucho tiempo esperando y muchas veces habia mala logistica y no pasaban por algunos centros.
 - Los alumnos se mostraron muy ápaticos ante este proyecto, pues exige habilidades que no les brindan sus carreras y este proyecto les suma muy poco a su desarrollo profesional por lo mismo. Aunado a una falta de liderazgo del socio formador, poco se puede hacer.
 - El servicio si requiere de tiempo y sobretodo trabajo y comunicación entre el equipo, pues te puede tocar zonas del parque extensas.
-
- Aprendí a como ser tolerante y paciente, y a no perder los ánimos cuando los estudiantes no se conectaban. Habían algunos que no podían entrar por circunstancias personales,

pero de algunos otros no se, y creo que simplemente no querían entrar y esto podía llegar a desanimarme un poco, pero yo entraba igual para aquellos estudiantes que si querían entrar

- Fue un poco triste al final del curso, ya que comencé con 5 alumnos y terminé solamente con 2, los demás se dieron de baja o nunca mostraron interés en el programa.
- Es necesaria mucha organización de tiempo, pero se puede lograr.
- Aunque haya durado poco me llevo mucho del curso/taller, me hizo conocer un poco más de las tradiciones de mi país.
- Me parece que en ocasiones no nos damos cuenta del beneficio o el cambio que podemos hacer sobre una persona con tan poco.
- Una vez más, hubo un muy mal manejo del tiempo por parte del SF
- Mi servicio social era todos los sábados del semestre a excepción de los sábados de semana Tec. Estas últimas semanas se ha tenido que cancelar el servicio porque ha hecho mucho frío, por lo que perdimos varias sesiones con los niños. Me gustaría proponer la idea de asistir todos los sábados en vez de no ir los sábados de semana Tec porque siento que se desperdicia mucho tiempo.
- un poco pesada en cuanto a horarios disponibles.
- Siento mucha decepción por esta experiencia, respecto a servicio social es la peor que he tenido. Cuando pregunte a que se debía el cobro de 150\$ a cada alumno (extrañamente a depositar en una cuenta personal y no institucional) la persona encargada se negó a decirme para que se utilizaría el dinero y solo me dijo "el pago es requisito para acreditar horas".

A lo largo del semestre nunca se me especificó el tono del material que me tocaba entregar, se me aprobó un moodboard con un estilo el cual tuve entendido que estaba bien y lo use como base para todos mis entregables (ilustraciones y mapas conceptuales) y justo un mes antes del cierre se me citó para amenazarme con darme de baja, durante toda esa junta la maestra estuvo interrumpiéndome a la hora de expresar mis motivos y proponer soluciones y en un tono cínico me dijo "dime si harás los entregables bien o mejor te damos de baja y el siguiente semestre buscamos a otro alumno para que lo haga" Comentario que en mi opinión fue muy poco profesional y puede sonar incluso abusivo desde su posición de maestra. Otra actitud suya que me pareció inadecuada fue que a la hora de presentarme traí bajos hechos por alumnos anteriores que yo tenía que re-hacer, se la pasó comentando que esos trabajos no le habían gustado nada, en un tono que desmeritava el trabajo de esos alumnos.

Nunca sentí que la carga de entregas fuera equitativa entre todos los que participamos y esta opinión la comparto con otras personas participantes de este servicio. No se cuenta cuantas horas se me vayan a acreditar, pero independientemente de si a la maestra le gustó mi trabajo o no, yo cumplí con entregar material de calidad con el tono que se me pidió para antes del cierre, esas horas ya las trabajé, haciendo y corrigiendo mil cosas.

- Dedicación y tiempo por parte del socio formador
- Estuvo muy padre la verdad siento que este servicio social rompe con el prejuicio de que el servicio social está aburrido, quita tiempo etc etc
- Más que el servicio social, mi experiencia en Canvas algunas de las entregas no se han calificado a pesar de faltar poco para calificar el semestre y esas actividades son requisitos para acreditar las horas de servicio social
- Falto un poco de organización
- He participado durante varios semestres como colaboradora en Niños Regios, mi experiencia siempre había sido buena, por lo que inscribía semestre con semestre el mismo servicio, sin embargo, este último fue una experiencia muy mala, no existió comunicación con la organización socio formadora, la organización por parte de la dirección era pésima, su retroalimentación era nula, el reparto de actividades era poco clara, la plataforma para la entrega de actividades no fue compartida en tiempo y forma como en ocasiones anteriores.

Me encantaba el servicio social de Niños Regios, pero esta última ocasión fue deficiente el trato entre coordinadores, dirección general, organización socio formadora, y por consecuencia nosotros como colaboradores, nos encontrábamos inconformes, cada sesión era más tediosa y aburrida que la anterior, y veía que los niños no se interesaban para entrar a las clases.

- Fue una experiencia increíble, desarrollé mi sentido humano y al mismo tiempo habilidades como la enseñanza.
- Me gusto mucho pero si hay mucha falta de comunicación y tiempo por parte de la organizadora.

- Hablaron mal del tec las personas que trabajan ahí, no son justas con el trabajo que dan y tampoco son claras con lo que necesitan que hagamos, es una experiencia que no recomiendo, y la plataforma del tec también tenía información equivocada del proyecto
- Mal atención por parte de los encargados del curso, no brindaban las herramientas a tiempo, no estaban concientes ni que estaba en el canvas y encargaban tareas por fuera de la plataforma que si bien era necesaria para que socio formador las pudiera ver, no estaba de más poner el link de todo eso en el canvas para más fácil acceso
- Este proyecto te deja hacer tus entregables en tu propio tiempo, por lo que es fácil organizarte y hacer las cosas a tu ritmo sin tener que distraerte de tus clases normales. El curso de canvas te da mucho contexto sobre las ODS y el enfoque que tienen los socioformadores. Sin embargo, en algunos momentos no quedaba muy claro qué teníamos que hacer exactamente o los medios de entrega.

Categoría: impacto

- No sentí que mi trabajo tuviera impacto, fue muy poquito lo que hice.
- Me cambio mucho la forma de pensar en lo que yo pensaba antes y tambien el como podemos ayudar de diferentes maneras aun y cuando se presenten problemas en la actualidad como es la pandemia.
- aprender el impacto que tenemos en otras personas
- Al elaborar los manuales de este servicio social, no solo serví a los demás sino que también me sirvió a mí.
- Una de las cosas que más me impacto es la gran cantidad de Organizaciones de la Sociedad Civil que existen solo en un estado.
- Pensé que iba a tener más alumnos, sin embargo con la alumna que tuve creo que si se generó impacto
- Antes del programa nunca pensé en ayudar a otra parte de México que no fuera Monterrey, soy de Guatemala y estoy ayudando a personas de un lugar que no sabía que existía.
- Aprendí mucho y tuvo un impacto en mi formación profesional, es una causa necesaria, para terminar con el rezago educativo, debemos trabajar en conjunto.
- Sentí que tuve un impacto real en los casos asignados
- Tiene mucho potencial de impacto social
- El proyecto me sirvió mucho para conocer diferentes contextos
- Deben tener muy en cuenta la voluntad de los EMS participantes, muchos fueron obligados, lo que tuvo impacto negativo en el desarrollo del proyecto.
- Me sirvió de mucho ya que visualice que otras organizaciones o fundaciones con enfoque social existen en otros estados.
- Siento que el TEC nos debe dar más herramientas para poder tener un verdadero impacto.
- Estuvieron abiertos a escuchar las ideas aunque algunas fueran o no con tanto impacto
- Como parte de mi servicio social me toco ayudar al desarrollo de nuevas vertientes de negocio para la organización socio formadora y no tuve el sentimiento en ningún momento de estas ayudando a una causa social. Además el trabajo con mis compañeros de equipo fue pésimo, no había comunicación ni intención de trabajar por parte de ellos y eso obviamente aumento la presión sobre mí y mi disgusto con la situación, en general una experiencia mala.
- Me sirvió mucho para desarrollar empatía
- A las asesorías que he ido, en algunas he visto muy participativos a los chavos y es señal de que hay impacto social.
- El nivel de responsabilidad que adquirí durante el servicio me servirá para el resto de mi vida profesional y personal
- Este proyecto me ayudo a concientizar y conocer la situación de la mayoría de los niños respecto a su situación educativa. Entender el impacto que a tenido la pandemia en toda la población y el desempeño que han tenido las autoridades para intentar solucionar las problemáticas presentadas.
- Nunca había dado asesorías y batallo con comunicarme con gente nueva, fue un reto, pero lo logré y creo ayudé a los alumnos a aprender.
- Las pláticas a las que nos mandaban realmente ayudaron en nuestro desarrollo
- Me cambio la perspectiva sobre cuestiones personales, las cuales me ayudaron a desarrollarme en este proyecto
- Actividades simples que tengan un gran impacto y una gran lección.
- Me impacto como las metas de las dos mujeres que me toco acompañar, eran muy similares y con las mismas complicaciones, falta de dinero.
- Experiencia completa que me permite desarrollar mis habilidades de investigación y difusión de contenido con impacto social.

- Me interesó realizar las actividades que hacia, ya que se informaba a la población sobre noticias del cancer infantil, ya sea avances tecnológicos, campañas para ayudar a niños, etc.
- Tuve una experiencia muy buena dentro del servicio, aprendí y desaprendí muchas cosas que me ayudaran en un futuro. Solo al final si tengo una queja y me encuentro muy molesta con la fundación. Acabe mi trabajo que me habían asignado y hasta nos habíamos despedido y al final me restaron 20 horas sin aviso previo porque no les había ayudado en otro evento, el cual nunca mencionaron, no me eniaron ningún mensaje y ya habíamos tenido una despedida hasta con retroalimentación. Además las actividades ya no eran vinculatorias con el tec, el cual era mi trabajo.
- Me pidieron algo muy técnico que no sabía hacer y fue una experiencia muy desagradable gracias a eso. Me la viví estresada porque no sabía cómo hacer lo que me pidieron y no había nadie que me pudiera ayudar.
- Me gusto haber podido trabajar con la organizacion y ayudarles con la pagina web, además pude informarme mas sobre la situacion en nuestro pais y el mundo de los niños que padecen de cancer.
- Honestamente, no la disfrute. No me gustaba la actitud de la persona encargada del servicio además de que sentí que lo que nos pedía realizar no era de mucho impacto y por eso me desmotivé y deje de meterme a las sesiones y realizar las actividades que nos pedía.
- Me ayudó a concientizarme sobre el impacto que tiene el ser humano al planeta
- Péssimo trabajo en equipo, 2/4 comapañeros no nos ayudaron en nada. Recibimos amenazas de que nos iban a reducir las horas de servicio porque íbamos atrasados.
- Ser parte de un grupo con tanto impacto en la vida de niños es una experiencia enriquecedora
- Me sirvió mucho para recordar temas visto en mi carrera y para saber como dar clases de maneras distintas a las convencionales

Categoría: quizzes

- Me parece una causa muy interesante pero la falta de comunicacion de parte de la osf lo hizo una actividad tediosa
- Me costo mucho entender que fechas va a comenzar ya que comenzamos haciendo los quizzes y actividades antes de tener juntas...
- Prefiero vivir la experiencia de servicio social como lo hacían antes de Tec21, a través de campamentos o actividades, en lugar de llevarlo como si fuera una clase más a la que tenemos que asistir.
- Algo que si le quisiera dejar al TEC es que le den acceso al canvas a sus mismos coordinadores del servicio. Si me molesto el hacer el quiz y tener que mandar los resultados, se me hace ineficiente.
- Las diferentes actividades que nos dan
- Las actividades en Canvas son absolutamente banales, inconsecuencias y por lo general, un gasto de tiempo y recursos. No contribuyen nada a la experiencia del servicio social y solo sirven para poner en riesgo la validación de el tiempo que hayas compartido con la organización, y posiblemente a los ojos del Tec, haber hecho nada, aunque en realidad eso hubiera sido lo opuesto. Los quizzes son tediosos, el material es redundante y esencialmente es una gran obviedad (especialmente si has llevado una optativa de ética o filosofía, requerimientos ya de graduación). No debería haber nada que hacer en Canvas, el servicio social no es una clase de matemáticas.
- Fue una lástima tener que vivir la experiencia de manera virtual, porque muchas actividades no se pudieron hacer, aún así fue enriquecedora.
- No pude asistir a ninguna sesión con la OSF debido a que se empalmaba con mis clases. Aunque pude ver algunas sesiones grabadas posteriormente, no fue la misma experiencia en comparación a estar en el momento. Cabe resaltar que esto no afectó mi interés por ser parte del Proyect Solidario, ya que estuve al tanto de las actividades que realizaban, y preguntaba dudas a la coordinadora Fany Tamayo.
- Aprendí mucho, sin embargo, siento que en ese proceso de aprendizaje perdí muchísimas horas, que como quiera destiné para las actividades.
- No hubo gran interacción con la OSF, nos pidieron ciertas actividades por Whatsapp pero jamás hubo ninguna interacción por videollamada u otro tipo. En varios momentos el grupo si se encontró un poco perdido en que hacer y que se esperaba de nosotros.
- Mucha desorganización y actividades o procesos no claros
- Senti innecesario el canvas y las actividades de este
- Todo muy bien, pero los quizzes difíciles y confusos.
- Hubo algunos problemas con la organización que le llevo a cabo ademas de problemas con

que los alumnos parecían no estar interesados, quizá si se corrigiera la situación mejoraría.

- Fue un poco insatisfactoria, porque los EMS que me asignaron no estuvieron interesados en participar, a excepción de uno, pero la 3er semana dejó de contestar y nunca mandó las actividades correspondientes

- Por favor quiten los quizzes. No sirven de nada. Los fundamentos éticos que tratan de instruir no se aprenden así de fácil con infografías y ya. Solo sirven para poner en riesgo las horas de trabajo y aprendizaje real que hayas desempeñado. La persona más egoísta y apática lo seguirá siendo con un 100 en todos los quizzes, así no se enseña ni se instruye ética ni conciencia social.

- Esta experiencia fue increíblemente retadora, porque significó enfrentar la realidad que muchos estudiantes mexicanos viven. Las deficiencias en el sistema educativo público habla de la mala preparación de los futuros profesionistas que serán los encargados de llevar a cabo las actividades económicas

- Fue algo decepcionante no poder tener la experiencia completa con los EMS, sin embargo, fue una buena experiencia el realizar las actividades del proyecto

- La verdad es que faltó mucha organización por parte de los organizadores. Para empezar, debieron de haber informado a los estudiantes respecto a las tutorías, luego, ponerse en contacto con ellos y pedirles la carta de consentimiento. Se me hizo incorrecto que dejaran esta responsabilidad en manos de los tutores, ya que nos tardamos mucho en empezar las tutorías y algunos no tenían interés en participar. De igual manera, el que asignaran alumnos nuevos cada semana, hizo que se hiciera más pesado, ya que habían algunos que iban desfasados en temas y se tenían que repetir varias veces. Por último, su sistema de asignación de estudiantes de acuerdo al examen de ubicación fue muy malo, ya que algunos alumnos tuvieron peores resultados en la asignatura de matemáticas y eran asignados a la asignatura de comunicación.

- Los quizzes son muy ambiguos y tediosos.

- En general fue una experiencia muy enriquecedora. Algo a notar quizás, es que me parece que los días de implementación en los que interactuamos con los y las invitad@s del campamento son pocos, y podría resultar una experiencia todavía más memorable para todos los involucrados de ampliarse un par de días.

- La maestra/ socio formadora me ayudo y fue muy comprensiva personalmente conmigo con una situación personal que no quiero comentar, pero me ayudo con los tiempos para las entregas de los quizzes, etc

- No me gusta el contenido de Canvas, siento que nos quita tiempo que podríamos empeñarnos en más actividades con la organización.

- Bailé mucho porque la mayoría de las actividades lo requerían. No me gusta bailar. Practicando la paciencia a todo lo que da.

- Los exámenes son repetitivos las actividades de canvas realmente no aportan mucho

- La organización y comunicación entre el Tec y la organización fue muy mala, pues todo el grupo se inscribió a un servicio semestral y este terminó siendo solamente de 5 semanas. La dinámica de la organización es muy mala pues realmente no estamos aportando ni aprendiendo nada de uso. Las actividades en canvas fallaban o tenían errores

- Una de las experiencias que viví fue el tener que desconstruirme como ser humano. Tuve que hacer una actividad sobre cómo mantener una higiene personal. Para lo uno se le puede ser muy sencillo y sin tener que buscar una instrucción sobre cómo lavarse los dientes, bañarse, rasurarse para otros si puede ser un poco más complicado de poder entender y lograr.

- Siento que esto podría llevarse a un nivel de conexión más profundo si se involucrará a los alumnos dentro de la planeación de las actividades de clase o permitieran tener sesiones destinadas únicamente a concerse unos con otros.

- la actividad presencial que tuve al visitar la veterinaria fue la más fructífera que tuve.

- Espero pronto el retorno a actividades presenciales para que el servicio social sea más vivencia

- No creo que sea necesario presentar los quizzes de canvas en todas las experiencias de servicio social.

- Las actividades estaban muy completas y padres para la educación infantil

- Las preguntas de los quizzes más allá de evaluar aspectos relacionados con el objetivo principal, terminan siendo ambiguas, redundantes y poco entendibles

- Me hubiera encantado realizar actividades presenciales, pero la pandemia no fue motivo para no sentir que aportaba en algo a la sociedad

- Estuvo muy interesante la parte de San Pedro de Pinta pero la actividad inicial no fue muy enriquecedora de ir a dar clases a una prepa, fue muy desorganizada y con poca inter-

acción.

- Siento que los quizzes son muy repetitivos
- La organización siempre estuvo al 100, todo se aprecio y lo único que me quejaría sería el hecho de que al ser en línea, las actividades se restringen mucho
- Se debe implementar más comunicación o actividades de integración.
- dentro de mi servicio social dentro de una actividad pude interactuar con la comunidad por medio de redes sociales
- Esperaba actividades más variadas.
- Este proyecto fue muy interesante, pero por la naturaleza de la actividad a realizar, en línea era muy difícil la comunicación para la enseñanza de un instrumento

- Los quizzes la verdad se me hacen innecesarios ya que son los mismos todos los servicios sociales.
- actividades que hacen ver las cosas diferentes
- Creo que los quizás que se realizan en Canvas son innecesarios y representan una pérdida de tiempo.
- Fue muy complejo el concretar horarios y confuso las actividades a realizar
- Los quizzes y como se califican están muy fuera de lugar
- Hice la materia en linea, y cada actividad siento que me aportó un aprendizaje.
- Creo que las actividades en canvas no son del todo necesarias
- Al haber compartido muchas actividades con personas pasando por diversos problemas, considero que fue una experiencia memorable.
- Me interesó realizar las actividades que hacia, ya que se informaba a la población sobre noticias del cancer infantil, ya sea avances tecnológicos, campañas para ayudar a niños, etc.
- Tuve una experiencia muy buena dentro del servicio, aprendí y desaprendí muchas cosas que me ayudaran en un futuro. Solo al final si tengo una queja y me encuentro muy molesta con la fundación. Acabe mi trabajo que me habían asignado y hasta nos habíamos despedido y al final me restaron 20 horas sin aviso previo porque no les había ayudado en otro evento, el cual nunca mencionaron, no me eniaron ningún mensaje y ya habíamos tenido una despedida hasta con retroalimentación. Además las actividades ya no eran vinculatorias con el tec, el cual era mi trabajo.
- Algo que no me agrada mucho son los examenes que ponen en la página de canvas. Siento que no son significativos para el servicio social.
- Realize muchas actividades que han desarrollado varias habilidades en mi vida social, académica, profesional etc.
- Los quizzes de canvas no sirven para nada, mucho menos si tengo que hacer los mismos cada que haga servicio social.
- Estuvo muy padre mi experiencia de servicio social, lo unico que no me encanto fueron los quizzes y actividades en Canvas. Estos a veces llegaban a ser tediosos y contenian información que no considero relevante.
- Debido a complicaciones de tiempo y comunicación de la misma socio formadora, no pudimos cumplir correctamente con las actividades
- Fue un servicio que también me permitió aprender también de nuevo temas y pude desarrollar nuevas habilidades al momento de realizar las actividades.
- Fue algo nuevo para mí convivir tan cerca con personas con discapacidad y realmente aprendí mucho de ellos y de la gente que organiza estas actividades.
- Considero que cada vez que he participado en un ejercicio de servicio social he realizado los mismos exámenes con las mismas temáticas y contenido, considero que es innecesario repetirlo tantas veces.
- Honestamente, no la disfrute. No me gustaba la actitud de la persona encargada del servicio además de que sentí que lo que nos pedía realizar no era de mucho impacto y por eso me desmotivé y deje de meterme a las sesiones y realizar las actividades que nos pedía.
- El servicio social me ayudó mucho a crear conciencia sobre las actividades que realiza la fundación y poder darles difusión para que más gente conozca su trabajo.
- Los quizzes no sirven para nada...
- El trabajo final podria ser diferente, quiza algo mas relacionado
- La organización socio formadora tiene un instagram en el cual publica todas las actividades de voluntariado que hacen y que son referentes a la construcción y la mano de obra. Yo entré a este servicio social pensando que así sería, pues en la ficha de inscripción, se solicitan aptitudes relacionadas al trabajo físico de este índole. Quedé desanimado y decepcionado al saber que, por motivos de la pandemia, no estaríamos realizando esta labor, sino que, en su lugar, realizamos los itinerarios de clases de diferentes materias

ias que se impartirían a niños, ni siquiera dándoles las clases. Estoy muy molesto y des motivado.

- A pesar de la experiencia enriquecedora, hubo momentos donde no comprendía del todo las actividades a realizar o los entregables para el conteo de las horas de servicio social.
 - Se debería dar una descripción más amplia de las actividades a realizar durante el semestre en la lista de opciones de servicio social.
 - Aprendí mucho acerca de mi misma al estar preparando las clases y los entregables, pues lo que al principio del servicio no estaba segura de cómo llevaría a cabo todas estas actividades.
 - Más que el servicio social, mi experiencia en Canvas algunas de las entregas no se han calificado a pesar de faltar poco para calificar el semestre y esas actividades son requisitos para acreditar las horas de servicio social
 - Casi no hubo interacción debido a la reincorporación de los niños a actividades presenciales
 - No vi mucho punto a las actividades. No se veían muy alineadas con el propósito del servicio social en el tec. Siento que pudieron haber estado más organizadas las actividades
 - Muy insatisfecha con las actividades puestas por la organización, creo que en ningún momento especificaron que haríamos actividades de ese estilo y tan pesadas, deberían especificar y poner las actividades claras y en escrito para poder tomar la decisión, ya que yo lo metí porque pensé que sería algo totalmente diferente
 - Sinceramente no tuve una buena experiencia con este servicio social como me hubiera esperado ya que los encargados no tenían buena comunicación, se tardaban en contestar los mensajes y solamente nos reunimos 2 veces en el semestre. Además no le pude dar asesoría a mi Mentee porque no contestaba mensajes y lo tuve que sustituir por realizar diseños de actividades.
 - Deberíamos de tener el fin de semana para hacer las actividades.
 - He participado durante varios semestres como colaboradora en Niños Regios, mi experiencia siempre había sido buena, por lo que inscribía semestre con semestre el mismo servicio, sin embargo, este último fue una experiencia muy mala, no existió comunicación con la organización socio formadora, la organización por parte de la dirección era pésima, su retroalimentación era nula, el reparto de actividades era poco clara, la plataforma para la entrega de actividades no fue compartida en tiempo y forma como en ocasiones anteriores.
- Me encantaba el servicio social de Niños Regios, pero esta última ocasión fue deficiente el trato entre coordinadores, dirección general, organización socio formadora, y por consecuencia nosotros como colaboradores, nos encontrábamos inconformes, cada sesión era más tediosa y aburrida que la anterior, y veía que los niños no se interesaban para entrar a las clases.
- Fue buena, pero creo que falta organización en cuanto a las actividades que debemos realizar por que dan indicaciones muy dispersas
 - No entendí nada. Estuvo super confuso todo en canvas. No llegaron anuncios jamás. Pensé que solo debía hacer quizzes. Pésima experiencia.
 - Siento que las actividades en CANVAS son innecesarias y una carga extra a parte de las actividades del proyecto solidario en si.
 - Solo mi asesor o mi mentor, nunca me contestaba y no sabía que hacer con las actividades.

Categoría: canva

- Algo que si le quisiera dejar al TEC es que le den acceso al canvas a sus mismos coordinadores del servicio. Si me molesto el hacer el quiz y tener que mandar los resultados, se me hace ineficiente.
- Senti innecesario el canvas y las actividades de este
- La parte de canvas se me hace una distracción del proyecto solidario
- Los exámenes son repetitivos las actividades de canvas realmente no aportan mucho
- La organización y comunicación entre el Tec y la organización fue muy mala, pues todo el grupo se inscribió a un servicio semestral y este terminó siendo solamente de 5 semanas. La dinámica de la organización es muy mala pues realmente no estamos aportando ni apoyando nada de uso. Las actividades en canvas fallaban o tenían errores
- No creo que sea necesario presentar los quizzes de canvas en todas las experiencias de servicio social.
- El objetivo del proyecto me parece muy importante, los recursos y plataforma son de mucha ayuda, pero considero en la materia de matemáticas se pueden reducir algunos temas a

l requerir más tiempo para ser vistos. Considero también se pueden incluir tutorías personalizadas para los temas y dudas específicas de cada EMS.

- Muchos de los estudiantes no sabían que estaban en el proyecto y no conocían nada acerca de la plataforma o del objetivo del proyecto, creo que hace más falta darles más explicaciones sobre esto y tampoco encargar tanta tarea porque ellos lo toman como una carga extra y dejan de asistir a las asesorías.

- Creo que las actividades en canvas no son del todo necesarias

- El curso en canvas es irrelevante e innecesario.

- Algo que no me agrada mucho son los examenes que ponen en la página de canvas. Siento que no son significativos para el servicio social.

- Todo bien con la OSF, sin embargo, considero irrelevante los temas que vienen en canvas en el curso de servicio social, vienen muchas definiciones y teoría que en lo particular siento que son tediosas y no ayudan a sensibilizarte. Me sensibilicé mucho más al momento de dar clase y escuchar a mis alumnos, el curso sobra.

- Los quizzes de canvas no sirven para nada, mucho menos si tengo que hacer los mismos cada que haga servicio social.

- La única área de oportunidad que veo con Jann es que sigan en constante actualización y mantenimiento de la plataforma que se utiliza para todo. Ya que de pronto tienen muchos errores o fallas que dificultan el proceso y como somos muchos las líneas de atención muchas de las veces están saturadas y no hay nadie que te resuelva dudas al momento.

- Me gustó mucho, sin embargo, la experiencia en canvas es bastante deficiente, incluso me atrevería a decir que no aporta casi nada a los usuarios.

- He participado durante varios semestres como colaboradora en Niños Regios, mi experiencia siempre había sido buena, por lo que inscribía semestre con semestre el mismo servicio, sin embargo, este último fue una experiencia muy mala, no existió comunicación con la organización socio formadora, la organización por parte de la dirección era pésima, su retroalimentación era nula, el reparto de actividades era poco clara, la plataforma para la entrega de actividades no fue compartida en tiempo y forma como en ocasiones anteriores.

- Hablaron mal del tec las personas que trabajan ahí, no son justas con el trabajo que dan y tampoco son claras con lo que necesitan que hagamos, es una experiencia que no recomiendo, y la plataforma del tec también tenía información equivocada del proyecto

- Mal atención por parte de los encargados del curso, no brindaban las herramientas a tiempo, no estaban conscientes ni que estaba en el canvas y encargaban tareas por fuera de la plataforma que si bien era necesaria para que socio formador las pudiera ver, no estaba de más poner el link de todo eso en el canvas para más fácil acceso

- Este proyecto te deja hacer tus entregables en tu propio tiempo, por lo que es fácil organizarte y hacer las cosas a tu ritmo sin tener que distraerte de tus clases normales. El curso de canvas te da mucho contexto sobre las ODS y el enfoque que tienen los socio formadores. Sin embargo, en algunos momentos no quedaba muy claro qué teníamos que hacer exactamente o los medios de entrega.
